Commander 2nd Air Division USAF Forces VIETNAM
Air Attache Australian Embassy SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

General

1. The unit realised an increase in hours flown during December, mainly due to the easing of the inclement weather in the central and northern provinces, as well as increased Viet Cong night activity which resulted in increased flare ship utilization. Enemy activity in the vicinity of Cape St Jacques increased, and consequently Vung Tau security precautions were tightened. Three aircraft sustained hits from ground fire, and one assistant loadmaster has been grounded due to chronic airsickness.

Statistics

2. Operational statistics for the month of December are as follows:-

Sorties:	Daylight	658	Night	28
Hours flown	"	451.25	"	70.55
Weight carried	1,560,150 lb			
Passengers	3205			
Medevacs	1			

Operational Intelligence

3. General Viet Cong Activity. The trend of VC activity during November, continued to increase during early December, reaching a peak with regard the size of units involved during mid month. The latter weeks of the month were characterized by a shifting of emphasis from large to small unit actions on the part of the VC. Fighting was general throughout the Delta and coastal provinces.

4. Phouc Tuy Province. Two major actions were fought in Phouc Tuy province (in which Vung Tau is situated), both taking place in the vicinity of Binh Gia hamlet covering an area from 12 to 20 miles North East of Vung Tau. At the time of writing this report, the second engagement is still in progress and it is believed that friendly forces have sustained fairly heavy losses. No reports of enemy losses have been received.

Airfield Defence.

5. Vung Tau. Reports have been received of Viet Cong infiltration into Vung Tau, however it is considered that this infiltration is intended at gathering intelligence rather than for the purpose of terrorism. Airfield security has been increased as follows:-

- (a) Additional areas adjacent to the airfield perimeter have been mined.
- (b) Unit functions in the event of attack have been defined as follows:-
 - (i) ARVN units exercise mobile offensive patrols beyond the outer perimeter.

CONFIDENTIAL

...../2

- (ii) US Army units man the defence bunkers within the airfield perimeter.
- (iii) The RAAF units function fulfills that of the mobile reserve.
- (c) A system of bunkers has been installed around the outer airfield perimeter.
- (d) Frequent practice alerts are conducted, to assess the flexibility and alertness of airfield defenses.

6. Aircraft Dispersal. Little can be done to disperse aircraft to minimise the effectiveness of mortar attack at Vung Tau due to:-

- (a) Limited ramp space available.
- (b) The difficulty of securing the extended perimeter, if dispersal was to be achieved by parking aircraft on the inactive runways (this action in itself would place the aircraft close to the outer defence perimeter).

7. Deterrent to Mortar Attack. The main deterrents to mortar attack are felt to be the ARVN outer patrols, and the terrain in the Cape St Jacques area. The nature of the terrain is such that the area of mangrove swamp which comprises most of the isthmus on which Vung Tau is located, limits the routes of withdrawal for an enemy force. The US Army mounts airborne helicopter patrols, and has a flare equipped Caribou on alert to combat any attempts at mortar attack.

Operations

8. Aircraft hits. The theatres of operations were unchanged during December, ground fire was encountered in most provinces and the following aircraft were hit:-

- (a) One aircraft hit during an overshoot at Tabat, a DZ in Thua Thien province, five miles from the Laotian border (skin damage only).
- (b) One aircraft was hit while crossing the coast at 1500 ft (just below cloud) en route from Da Nang to Kam Ty in Quang Tin province. (Skin damage to an engine nacelle, hydraulic line ruptured, emergency down line cable severed. The crew improvised by opening the aircraft internal lining, and used pliers to pull the appropriate severed cables and actuate emergency undercarriage lowering).
- (c) One aircraft hit while carrying out a supply drop at Ben Kat in B Duong province (skin damage only).

9. Flare operations. Flare crews continued to draw small arms and automatic ground fire up to .50 calibre. Reports were received of increased accuracy, particularly in lead, but the general cloud cover permitted flare missions to be flown at 4000 ft, thus reducing the effectiveness of the fire.

10. General ground fire trends. The more intense ground fire was once again encountered, as is to be expected in areas of greatest Viet Cong actual activity (Mekong Delta, central plain, coastal low lands and valleys). The areas adjacent to the Cambodian border were quiet, despite the numerous re-supply missions flown into special forces camps in this area, it is felt that VC units in the vicinity of the Cambodian and Laotian borders are more extent on infiltration through to the active coastal and Delta regions, and hence are reluctant to reveal their presence.

11. New techniques. Only one new technique was used, and was carried out as follows:-

- (a) Mission consisted of a supply drop, using A22 packs and equipment (which require a minimum drop altitude of 700 ft) into a special forces camp by the Cambodian border in the Mekong Delta region.

CONFIDENTIAL

-3-

- (b) General 8/8 overcast at 400ft prevented a normal level drop run being made at 700 ft (no extraction chute was used so low level procedure could not be adopted).
- (c) The crew adopted an experimental american technique which consisted of:-
 - (i) Approach the DZ at 300-400 ft, 120K.
 - (ii) At a point well before the DZ, pull up into an A22, extraction release climb attitude and maintain.
 - (iii) At 600 ft release the "gate" which provides rearward restraint, and the load falls clear under the force of gravity.
- (d) The drop was inaccurate, but the load was quite easily recovered.

This mission is considered significant in that it:-

- (e) Illustrated a requirement to be able to initiate supply drops of A22 packs from low level.
- (f) Drove home to the unit the need to develop 100% effective release gates (the drop inaccuracy was largely a function of a faulty release gate).
- (g) Required the actual drop to be done in cloud.

It is felt that this type of drop could have a definite application in the face of the similar low cloud conditions which prevail in the Fly and Sepik river regions of New Guinea, however it will require some experimentation to fully develop.

12. Air Sickness. One aircrew member (General Hand, Assistant Loadmaster) was grounded, after consultation with the local US Army doctor, for chronic air-sickness. A replacement member has been requested.

Future Operations

13. The flight's flare commitment has been cancelled waf 7 Jan 65, as it is felt that a C47 can be just as effectively deployed on flares, thus releasing the Caribou for its more specialized short field work. It is possible, to keep the technique alive, some planned flare support could be given to a specific unit such as the local Vietnamese Navy Junk Force, but no definite proposals have been considered at this early stage.

14. To replace the flare commitment, a second commitment is being undertaken in the Mekong Delta, using fields unsuitable for C47 or C123 operations. This schedule will be maintained on Mondays, Wednesdays and Fridays, thus the flight will now have two aircraft detached, and one committed to a schedule every day with the exception of Sunday. Of the remaining aircraft, one will be available for servicing, and the other available for daily unscheduled tasks, departing after the scheduled aircraft, so as to provide some space back-up for this commitment.

15. Every opportunity is being taken to employ the aircraft on its assault transport role, the unit has found the USAF operational tasking authorities extremely enthusiastic and co-operative in this regard, however some problems of accommodation away from Vung Tau, servicing of detached aircraft, duty periods sustained by aircrew and the fact that the South East Asian airlift concept does not encompass an assault transport capacity (with the possible exception of special forces re-supply), limits the scope of operations in this theatre. Two other aspects are significant in this regard:-

- (a) In attempting to deploy four of it's existing five aircraft, the flight is extending to the maximum.
- (b) The assault transport function is a US Army commitment, and this unit is associated with the US Army for logistic support only.

CONFIDENTIAL

...../4

CONFIDENTIAL

-4-

16. The Vietnamese Air Force has indicated that it may deploy a number of C47's, Helicopters and A1E aircraft at Vung Tau. This move is being watched with interest by all concerned at Vung Tau, as the existing ramp and hanger facilities are considered inadequate for the present battalion strength.

Recording of Flying Hours.

17. Flying hours have not been recorded exactly as required by AFO 1/A/3.

18. Some extremely long delays are experienced on the ground prior to take-off from certain airfields, and to have recorded from "chocks to chocks" would have resulted in an unrealistic inflation of times.

19. The method used is to note the time from take-off to touchdown in minutes, and where there is a figure exactly divisible by five this time is recorded as hours flown. When the figure is not divisible by 5 sufficient is added to make it so, and this new time is recorded. This averages out that 2 minutes of ground running time is included in each sortie. Since sortie length averages approximately 40 minutes, the ground time represents about 5% of total hours.

20. This is considered a realistic method and has avoided the accumulation of "Phantom hours".

The Equipment Problem

21. On arriving in Vietnam certain items of ground support equipment were requisitioned from American sources (i.e., towing tractors, hydraulic test rig etc). These requisitions seemed to lie dormant and were resubmitted. They have now been returned to the unit "disapproved in accordance with the unit agreement between the United States and Australian Governments" by US Army HQSC Vietnam.

22. MACV Headquarters was contacted and our interpretation of the agreement confirmed that US Army HQSC VIETNAM had not asked for arbitrary interpretation of the agreement, but rather had permitted the supply problems to dictate the necessity of such an interpretation. The US Army HQSC Vietnam were contacted and they confirmed that they had been instructed to supply our needs by MACV Headquarters, and our demands would have to be resubmitted. This puts us exactly where we were 5 months ago which is truly disappointing. The problems of the US Army are fully understood in that most of the major items asked for are TC&E items (Unit Scaled Equipment) and in consequence purchases are made for their own uses only.

23. One solution offered is to share the equipment with units based at this location. This on the surface appears to be the answer, but if a unit TC&E is correct, most units do not have excess of their needs and so our requirements can only be satisfied when a particular unit has satisfied its own task. This is only fair and reasonable but is far from economical from our viewpoint.

24. A recent case was the loan of an engine sling which permitted us to lift a PP out in 2 hours, but it then had to be returned for the owner unit's use and the RAAF waited a day to get the sling back. We are actioning this by asking the RAAF HQSC to vary our scale and supply us from RAAF sources (our 06 dated 7 Jan 65 refers). US Army HQSC is attempting to hold a meeting to solve some of these problems and we sincerely hope we will be invited to attend.

Accommodation

25. The flight is now occupying two Villas; the Villa Ngoc Huong for Sgts and Airmen, and the Villa Anna for Officers. Approval has been received for grants to the officers' and sergeants' messes which will allow improvements to be made to both.

26. To further relieve the overcrowded conditions at the Villa Ngoc Huong enquires are still being made to procure a further Villa for the SNCO's.

...../5

CONFIDENTIAL

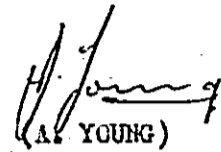

CONFIDENTIAL

-5-

Administration

27. The flight is not yet receiving Finance Circulars, 'N' orders, 'P' orders or amendments to 'A' orders and AFO's. The latest instructions held by the flight are:-

- (a) Finance circulars No 1964/7, 8 and 12 only,
- (b) 'N' orders to 120/1964,
- (c) AFO Weekly Orders to 1279, and
- (d) 'A' Orders to Issue No 80.

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

General

1. During January 1965 this unit flew the greatest number of hours that it has achieved in any previous month. Enemy action in Phuoc Tuy province abated after the series of actions fought in the vicinity of Binh Gia, but an enemy force of up to two regiments in strength is still thought to be in the region. No aircraft received ground fire during January.

Statistics

2. Operational statistics for January 1965 are as follows:-

Sorties	880
Hours flown	549.05
Weight carried	2,504,200lb
Passengers	4361
Medevacs	1

Operational Intelligence

3. General Viet Cong Activity. No significant change has been indicated in the general Viet Cong activity, friendly forces appeared to maintain a kill ratio in the vicinity of 3 to 1 with the majority of blood contacts being made by small units. Intelligence has indicated a movement of some VC forces out of War Zone D (located on the Saigon plain to the North and North West of Saigon). This movement is thought to be a two pronged deployment,

- (a) Northward in the direction of Ban Me Thuot, and
- (b) Eastwards in the direction of Ham Tan and Phan Thiet.

The cause of this deployment is considered to be the stepping up of offensive government operations within the war zone.

4. Phuoc Tuy Province. Viet Cong forces appear to have withdrawn to more favourable terrain after the battles which took place at Binh Gia. Their strength in this province is estimated at two regiments, and from the Binh Gia experiences a preponderance of the enemy forces appear to be "hard core".

5. Vung Tau. No incidents of terrorism or sabotage have occurred in Vung Tau since the unit has been based here, however warnings of Viet Cong infiltration are being received from Vietnamese sources, and the flight has mounted it's own guard on the two Villas. This guard operates in conjunction with Vietnamese police guards.

6. Ground Fire. No unusual trend has been indicated in the nature of ground fire from small arms and automatic fire up to 50 calibre. Reports of air burst A/A in the Tay Ninh province (about five miles south of Dautieng) have been received on seven occasions, and one report indicates that a USAF C123 aircraft may have been hit by "light flak" in this region. No reports have indicated the nature of this airbursting A/A.

CONFIDENTIAL

...../2

Operations

7. Aircraft Hits. None of the flight's aircraft were hit by ground fire during January.
8. General Operations. General operations were as predicted in the December 1964 report. The now scheduled task in the Mekong Delta is developing satisfactorily.
9. Flare Demonstration. One aircraft carried out a demonstration of the flare dropping technique while at Butterworth. The mission was considered to be unsuccessful, due to the number of flares which burnt through their parachutes during the decent (4 out of 5), and did not give a realistic indication of the reliability of the flares or their effectiveness in illuminating attacking enemy forces at night. The reason for cancelling the exercise was the grave risk of starting forest fires.

Tactics

10. Fighter Support. On supply dropping missions where fighter support is available (mentioned in previous reports), the USAF transport aircraft are carrying smoke grenades or markers. Upon receiving ground fire the marker is thrown out of the aircraft to mark the approximate position of the enemy force for the subsequent fighter strike. It is thought that this technique could be evaluated with a view to operations in Borneo, where the employment of jet aircraft on fighter support would probably present greater problems in target identification, than those already experienced with armed helicopters and piston engined fighters in Vietnam.

Equipment

11. A conference was held in Saigon on 28th January at the International Military Assistance Office (MACIMAO) on the subject of the provisions of Equipment from US sources. Members present were the Unit Engineering Officer, Unit Equipment Officer and six staff officers from various echelons in USMACV.
12. This conference served to introduce the Unit Equipment Officer to all executive levels in the channel of supply of equipment from US sources, and to clear up outstanding demands currently held by the US supply organizations, and also rejected demands referred to in our REFV 104/1/Air(11) 5 Jan 65 paragraphs 21 et seq.
13. It was agreed by all attending, that the conference had no mandate to decide upon any changes in the terms of the inter-governmental understanding, because this would be a matter for reference by each party through their respective service channels for consideration at a higher level.
14. It was agreed by MACIMAO that the RAAF would submit a current list of all equipment demands either previously rejected or outstanding through 709th Bn to Hq Support Command (US Army) who could authorize priority No 1 supply action.
15. This action was completed on 9 Feb 65.
16. Considerable, and quite unacceptable delays are being experienced in the onforwarding of civil air cargo received into Tan Son Nhut airport for this unit. Cargo is forwarded by the airline into customs, then it has to wait clearance and collection by Air Attache Saigon and delivery by his office to Space Control (USAF) at Tan Son Nhut, where it is eventually onforwarded to the flight by military aircraft.
17. The delays are involved in the forwarding of advice from the civil air carrier and the subsequent actioning of customs clearance.
18. This matter is at present the subject of investigation with Air Attache Saigon. It is requested that his responsibility in this matter be determined.
19. A review of the unit scale of equipment (AAP 1098) has been initiated, and recommendations for any variations will be actioned. This could not be attempted earlier because all amendments to the scale were not held. These amendments have now been received.

Accommodation

20. Efforts are still being made to provide a further Villa for the SNCO's, to relieve the existing accommodation pressure at the Villa "Ngoc Huong", which will be aggravated when rotational postings commence. Recommendations have been made to J4 USMACV concerning a 2 storied 16 bed accommodation Villa located opposite the civil police barracks.

Personnel

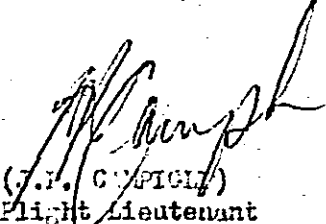

21. Advice has now been received detailing the first party due to arrive as replacements. No advice has been received however, on replacement aircrew other than for 1 crew chief.

Medical

22. The NCO Medical Orderly has made satisfactory arrangements with the Base Medical Officer on treatment facilities for RAAF members.

Administration

23. Finance Circulars, 'H' orders, 'I' orders and amendments to 'A' orders and AFO's are now being received. A quantity of AFO's are missing from the unit copy and action has been taken to obtain them.

RAAF Transport Flight VIETNAM
C/- Air Attache SAIGON
C/- Department of External Affairs
CANBERRA ACT

8th May 1965.

Secretary Department of Air Russell Offices CANBERRA ACT
Commander 2nd Air Division USAF Forces VIETNAM
Air Attache Australian Embassy SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st April 1965 to 30th April 1965. The new Commanding Officer, Sqn Ldr HARVEY DFC AFC assumed command of the unit on April 6th and Sqn Ldr SUGDEN left SAIGON for AUSTRALIA on April 8th. The changeover of command coincided with the visit of CAS designate Air Vice Marshal HUNDOCK.

2. Aircrew changeover continued with the arrival of two more pilots and one loadmaster.

3. The following are the statistics for April 1965:-

Sorties	927
Hours Flown	543 hrs 20 mins
Cargo Carried	1,176,373 lbs
Mail	8971 lbs
Passengers	3620
Medevacs	2

Operations

4. Operations continued as normal throughout the month. One Australian Army Warrant Officer was medevaced to RSH Singapore and one RAAF airman to NHA TRANG.

5. Several aircraft were fired upon but no hits were sustained.

Training

6. New pilots have been further integrated with the flight and are adapting quickly to the new environment. It is felt however that they could have been better prepared for this type of flying if their training at RICHMOND had included some genuine short field work and an occasional loxex under realistic conditions. This refers particularly to the young and relatively inexperienced pilots received lately. A 3000 ft bitumen strip in flat country is a far cry from a 1000-1200 ft strip of uneven rocky dirt perhaps surrounded by trees or houses.

7. There are no current AAP 1124 Flight Manual Caribou in the unit. Our 075 dated 7th April 1965 requested supply of Qty 12 from Headquarters Support Command.

Equipment

8. As a result of the recent changeover of Unit Engineering Officer a review was made of outstanding demands on the US Army for items of ground support equipment referred to in paragraph 12 of our report dated 6th April 1965. The listing has been reduced considerably, and a consolidated list has been referred to US Army for hastening of supply.

9. The review of Unit Scale of Equipment (AAP 1098) is in its final stages of completion. The review was deferred to enable the incoming Engineering Officer to assess equipment ground support requirements. A submission to Headquarters Support Command vide ABO E 4/5 will be made within the next two weeks.

10. The construction of an equipment store with reasonable security facilities has been completed. Action is under way to review stock holding requirements for equipment supplied from RAAF sources.

11. The Air Attache, SAIGON, advised that the subject of a suitable consignee

CONFIDENTIAL

.../2.

CONFIDENTIAL

-2-

address at Tan Son Nhut (Saigon) for equipment being supplied to this unit, is being investigated with the appropriate US authority. It is considered, however, that with the recently announced movement of the 1st Bn RAR to this theatre, the Australian Army may be considering the establishment of a military forwarding organisation at SAIGON. It is recommended that the possibility of the RAAF utilising this facility be investigated.

Accommodation

12. The existing accommodation at the Airmens' and Officers' billets is adequate. Accommodation for one SNCO has been effected by conversion of a small store room located in their quarters. Action to relocate the Airmens Club and convert that room into a bedroom has been held in abeyance pending availability of unit labour. Action has been taken to provide the SNCOs with "snack bar" type cooking facilities. With the change of weather to monsoonal conditions this will enable SNCOs to partake of meals without the discomfort of travelling to and from the American SNCOs Club. The kitchen facilities provided at the Officers billets have proved successful. Members do their own cooking and there have been no complaints regarding either the variety or quality of the meals produced.

Personnel

13. The rotation of tour members is approaching conclusion. The strike involving Pan American Airways during the month created several problems, in particular the notification of revised movements advices affecting the fourth draft exchange. The fourth draft exchange took place during the period 9th and 13th April and the fifth draft exchange between 23rd and 26th April.

Medical

14. The number of members who received medical treatment was 22, a reduction of 7 from the March figure. All inoculations are current.

15. Samples of tap water from the Airmens and Officers billets were forwarded to the Pasteur Institute in SAIGON for analysis. Due to some confusion which arose at Tan Son Nhut, the samples were not delivered and subsequently were returned to the US Army Medical Officer on this base with the comment that they were no longer suitable for analysis purposes. Another attempt to obtain an analysis will be made when suitable bottles are available.

Accounting

16. The exchange of Sergeants Clerk Financial Accounting took place this month. Action has been initiated for an increase to the unit establishment of a Corporal Equipment Accounts. It was determined that no continuity in assistance could be given from members of the equipment staff.

Aerodrome Defence

17. The situation relating to the defence responsibilities for Vung Tau airfield has changed dramatically. Units of the US 173rd Airborne Brigade are now deployed in this area, with the task of denying enemy access. At this stage the Defence Plan for the airfield has not been amended but changes are expected.

Security of Billets

18. A paper was submitted to your Department under cover of MKV 6/5/Air (12) dated 4th May 1965. Recent action taken by the US Army regarding the overall security of the Vung Tau area now confirms the opinion that existing measures taken for the security of personnel in the billets area are adequate.

Ground Defence Training

19. The attachment of a Ground Defence Instructor has enabled continuation weapon training to be inaugurated. Members are being familiarised on the weapons with which they have been issued from US Army. Range firing practices are being conducted for

(a) Familiarisation of newly arrived members

CONFIDENTIAL

.../3.

(b) Continuation training of all members.

Air crew members are also carrying out range practices under supervision.

Combat Pay

20. We finish this report by taking the opportunity of quoting a paragraph from a US 765th Transport Battalion Bulletin:

" SPECIAL PAY FOR DUTY SUBJECT TO HOSTILE FIRE: All units and sections, except the 56th Trans Co (DS), responsible for preparation of USASCV Form 58 (Special Pay for Duty Subject to Hostile Fire) will submit completed forms for eligible members to Airfield Operations not later than 1 May 65. This pertains to all eligible personnel, whether rated or non-rated. Consolidated certificates for each unit payroll (765th Trans Bn Forms No 68, 23 Mar 65) will be prepared by Airfield Operations and the 56th Trans Co and forwarded to the Battalion Personnel Office not later than 5 May 65. (ASH-P/632) 3-3"

This provides us with a certain amount of amusement especially as some US personnel qualify for this pay by travelling between VUNG TAU and SAIGON in our RAAF Caribou aircraft.

Secretary Department of Air Russell Offices CANBERRA ACT
Commander 2nd Air Division USAF Forces VIETNAM
Air Attache Australian Embassy SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st May 1965 to 31st May 65.
2. Aircrew changeover continued with the arrival of two pilots and one loadmaster.
3. The following are the statistics for May 1965:-

Sorties	777
Hours flown	490.15
Cargo carried	1,034,018 lbs
Mail carried	8024 lbs
Passengers	3003
Medevacs	282

Operations

4. Operations were somewhat curtailed this month due to two aircraft being extensively damaged. However on only eight days whilst A4-179, A4-193 and A4-210 were undergoing "D" servicing we were unable to provide the four aircraft required of us. A4-173 landed short at HAIYEN on 7th May 65 and A4-171 suffered a collapsed nose gear while taxiing on the strip at TANH LINH. Both aircraft were recovered but the recovery of A4-173 would have been extremely unlikely without the generous support and co-operation given by the US Army.
5. The quick and favourable response by the Department of Air and by No 38 Squadron to our request for the provision of an aircraft on loan until A4-171 and A4-173 are back in service is sincerely appreciated and should permit us to meet our full daily commitment.
6. Several aircraft were fired upon and two strikes were received on A4-179 and one on A4-193. Only minor damage occurred to the airframe and suitable repairs were carried out.

Training

7. New pilots have adapted well to conditions in Vietnam and are coping well with the added difficulties brought about by the wet season.
8. Several GCA practice approaches have been carried out at DANANG and NHATRANG when time has permitted.

Equipment

9. The review of Unit Scale of Equipment (AAF 1098) referred to in our report dated 8th May 1965 (104/1/Air (20), paragraph 9 has been completed and scale variations requests were submitted to Headquarters Support Command (2101/1/Equip (42) 2nd June 1965.
10. It is proposed to increase the size of the recently constructed unit equipment store, by relocating stocks of aircraft lashing and tie down equipment, at present located in the vicinity to a secure lock up "Conex". The additional space will permit the carrying of a more comprehensive range of moving stock and provide more suitable storage for items held on EOS.

-2-

11. The task of selecting a suitable address at Tan Son Nhut (Saigon) for addressing of inwards consignment was handed over from the Air Attache Saigon early in May. First enquiries were lodged with the International Military Assistance Officer (MACIMAO) SAIGON. This office has referred us to the Port Terminal Office, Khan Hoi Area, Saigon. Initial discussions with this office raised the question of the Vietnamese authorities approving the US authorities to clear Australian services consignments through Customs. This problem has not yet been resolved. A visit to Saigon by the Equipment Officer to resolve this point and any other problems envisaged did not meet with success, as the US Naval Officer he sought was not available. Efforts have been made to continue discussions by telephone and to date has met with no success in locating this officer (who operates from several locations). It is proposed that the Equipment Officer will make another visit to Saigon in the near future to attempt to finalise this matter. It is pointed out that there is no opportunity for the Equipment Officer to utilise the occasions of his pay run to Saigon for this purpose.

Accommodation

12. The provision of snack preparation facilities at the Sergeants' billets has proved so successful that a requirement has now arisen for the provision of additional refrigeration and a gas stove to enable members to cook more substantial meals. Action has been taken to provide a 10 c ft refrigerator from US Army sources and a gas stove from the RAAF. (Domestic Gas Stoves not being available from US in country sources). A 16-18 cu ft deepfreezer has been obtained from the US Army and has been installed in the kitchen at the officers billets. This will permit the storage of frozen foodstuffs and add to the variety of the menu.

Personnel

13. The sixth draft exchange took place during the period 7th-10th May.

Medical

14. The number of members who received medical treatment was 22. All inoculations are current. One member was repatriated to Australia on the recommendations of the US Army medical officer. Potable and pleasant tasting water is now readily available on the base and a water cooler has been installed at Unit Headquarters. There are now 3 water coolers in use 1 in Hqrs, 1 in Maintenance Hangar, 1 in the Hotel NGOC HUONG (Airmens Billet). Demand action has been taken for 1 for the Villa Anna (Officers Billet). The water on tap in the billet areas is not potable and the coolers are/will be refilled with water from the base.

Accounting

15. The area inspector of accounts from HQFEAF carried out his inspection during this period.

Aerodrome Defence

16. No changes have been made to the Base Defense Plan. A drill alarm was sounded at 1645 hours on 28th May, and the unit took part in a simulated exercise requiring the members to actively participate in the unit defense role. The men acquitted themselves very well. One of the lessons learnt was a need for SNCOs to be given training in elementary infantry section leading and the ADI has initiated a training programme accordingly.

Security of Billets

17. Work is progressing on wiring windows in the billets, but has ceased temporarily until more supplies of wire come to hand. The US authorities have negotiated a local contract to provide more suitable defence lighting and wire fencing around billets in the area. The billets occupied by this unit have been included in the contract.

18. Action has been taken with the local Chief of Police to prevent a tendency by policemen on duty at the billets to absent themselves from their post for varying periods and to sleep when on duty.

CONFIDENTIAL

-3-

Ground Defence Training

19. A programme of range firing practices and weapon training is being conducted by the Aerodrome Defence Instructor. In the light of lessons learnt from the last Base Defence Exercise, fieldcraft is also being taught.

Correspondence

20. Correspondence for which a reply is still awaited is our 3/1/Air (38) dated 1st May 1965, medical evacuation of Australian servicemen outside VIETNAM. Some of the queries raised however have been answered by statements in Department of Air Organisation Directive No 3/65 received on 26th May 65.

RAAF Transport Flight VIETNAM
C/- Air Attache SAIGON
C/- Department of External Affairs
CANBERRA ACT.

6th July 1965.

Secretary, Department of Air, Russell Offices, CANBERRA ACT.
Commander 2nd Air Division USAF Forces VI TNAM
Air Attache Australian Embassy SAIGON VI TNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations at RAAF Transport Flight VI TNAM from 1st June 1965 to 30th June 1965.
2. With the arrival of two pilots and one loadmaster the changeover of aircrew is now completed. This last changeover ferried A4-208 from AUSTRALIA to VUNG TAU.
3. The following are the statistics for June 1965:-

Sorties	859
Hours flown	536.55
Cargo carried	924,471 lbs
Mail carried	9483 lbs
Passengers	4299
Medevacs	Nil.

Operations

4. Operations continued as normal this month with the following exceptions. Some sorties were aborted in the delta region and also in I Corps area by the DANANG based aircraft due to weather conditions.
5. The NHA TRANG based aircraft returned to VUNG TAU on the night of 27th June 1965 when the NHA TRANG airfield came under mortar attack. The aircraft returned to NHA TRANG to continue operations Monday morning but has been returning to VUNG TAU after each day flying as the NHA TRANG airfield is considered insecure overnight.
6. Several aircraft were fired upon and the following strikes received. A4-208, 4 strikes, extensive damage to stbd underside of fuselage. Minor damage to tail, fin, rudder and rear fuselage. A4-210, A4-179, A4-193 minor skin damage only.
7. A4-208 received strikes while on landing at ASHAU in the I Corps area. It is now mandatory when landing at ASHAU and ALUOI, 10 miles apart in the valley to have armed fighter escort due to extensive VC activity.
8. The quick and favourable action of Department of Air and No 38 Squadron to our appeal for a loan aircraft to tide us over whilst A4-171 and A4-173 are undergoing repairs is sincerely appreciated. The aircraft, A4-208 which arrived 03 June, was put to immediate use and unfortunately it received four bullet strikes during its first week of operation. Details regarding progress and frustrations concerning the repairs to A4-171 and A4-173 were forwarded under cover our 2501/1/Tech dated 2nd July- June Monthly Servicing Report.
9. As a result of maintaining the flying effort with only five aircraft over the three month period following the accident A4-185 on 19th November 1964 and of having to fly all available aircraft at an even rate during May with disregard to desired stagger, we came near to reaching the embarrassing situation of having four engines reach their expired life almost simultaneously. As no complete engines are available at VUNG TAU considerable time loss is incurred in removing an engine, stripping same and building up a replacement engine. The situation was foreseen and trouble was avoided by Headquarters Support Command quick response to our

CONFIDENTIAL

-2-

request for allotment of two engines and by the Officer Commanding RAAF BUTTERWORTH in granting us permission to carry out the engine changes at BUTTERWORTH where the engines were awaiting our collection.

Training

10. Flg Off HARSH and Flg Off BAGGETT have been checked out as right hand seat captains. This will enable non captains to gain flying experience with other than Sqn Ldr HARVEY and Flt Lt COOPER who previously were the only other HIS captains.

Equipment

11. The equipment store has been extended. It is proposed to increase the size of the recently constructed unit equipment store, by relocating stocks of aircraft lashing and tie down equipment, at present located in the vicinity to a secure lock up "Conex". The additional space will permit the carrying of a more comprehensive range of moving stock and provide more suitable storage for items held on BOS.

12. No further action has been taken to obtain assistance from Headquarters Support Activity SAIGON (HSAS) regarding clearance at Tan Son Nhut of air consignments addressed to this unit because of action being taken by air Attache vide Depair 409/7/3 (12) dated 10th June 1965.

13. The visit to HSAS on 8th June indicated in our 2101/Equip (10) dated 7th June 1965 was unsuccessful as neither of the USN officers to be visited could be located at any of their three offices.

Accommodation

14. The increase to the personnel establishment of four airmen for Billet Guard duties, and one Cpl Clk EA has now brought accommodation at the Hotel NGOC HUONG to straining point. Action is in hand to replace several 3/4 size beds with single beds, in addition double bunks will be introduced for use by transients during tourex rotation phases.

15. A 16 cu ft deep freezer has been obtained for storage of foodstuffs in the Sgts Club. The gas stove sought for the Sgts Club has been sealed and RAAF Base BUTTERWORTH is arranging procurement. Action is in hand to provide snack bar cooking facilities for the Airmens Club. A water cooler has been installed in the officers billet and supply of a water tank trailer for joint use of both billets has been initiated with the US Army.

Personnel

16. Unit rotation of personnel was completed on 10th June. The respite between now and mid August when the whole business starts again will be welcomed by administrative personnel who will be able to catch up with the backlog of stores accounting and internal audit.

Medical

17. The number of members who received medical treatment was 42. The increase from the previous months can be attributed in part to the advent of the monsoons with its attendant humid weather conditions.

18. The provision of an adequate supply of potable, palatable cool drinking water is no longer a problem.

Accounting

19. The recent establishment of a Cpl Clk EA will ease the considerable workload at present borne by the Sgt Clk EA. The reports by the Area Inspector of Accounts more than substantiated the need for additional staff, because most of the points raised in his reports related to errors of omission caused by the need to deal mainly with important details at the expense of what could be termed relatively unimportant ones.

20. A 100% stock take of equipment has been initiated and will be completed in the next few days.

CONFIDENTIAL

.../3.

Aerodrome Defence

21. No change in Aerodrome Defence is reported.

Security of Billets

22. RAAF security guards are now posted to each billet during the hours 2200 - 0600 hrs daily. Apart from giving added security this also ensures that the National Police stay awake and on the job. Neither villa is ever completely void of service personnel during daylight hours.

Arrival of No 1 RAR

23. HMAS SYDNEY arrived off VUNG TAU at 0700 hrs on 8th June with members and equipment of No 1 RAR. Two RFV aircraft enroute VUNG TAU - TAN SON NHUT flew a salute past the carrier as she approached her anchorage. The Flight was able to help in this operation in a very small way and it was most gratifying to read Colonel PREECE thanks in his report on the off loading of HMAS SYDNEY.

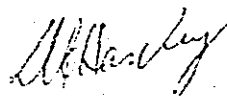

QUOTE

"It is most difficult in such a comprehensive undertaking to single out particular individuals but I feel due credit and sincere thanks must be made to:-

Col.....
.....operation,
Sqn Ldr HARVEY and his RAAF Flight VIETNAM at VUNG TAU for their generous hospitality, use of accommodation and transport facilities both road and air at any time during the operation, and the demonstration of the closest sister service co-operation".

Combat Pay

24. Further to our amusement at para 20 of our monthly report dated 8th May 1965 we advise that all United States servicemen serving in VIETNAM now receive combat pay irrespective of their mustering or employment. Crews have noted over recent weeks the sharp fall of of requests for rides as cargo handlers.

(D.C. HARVEY)
Squadron Leader
Commanding Officer

RAAF Transport Flight VIETNAM
C/- Air Attache SAIGON
C/- Department of External Affairs
CANBERRA ACT.

104/1/Air (30)

11th August 1965

Secretary, Department of Air, Russell Offices, CANBERRA ACT.
Commander 2nd Air Division USAF Forces VIETNAM
Air Attache Australian Embassy SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st July 1965 to 31st July 1965.
2. Four general hands arrived from AUSTRALIA for employment as Assistant Loadmasters and have been integrated into the flight.
3. The following are the statistics for July 1965:-

Sorties	857
Hours flown	558 hrs 25 mins
Cargo carried	1333951 lbs
Mail carried	10037 lbs
Passengers	4798
Medevacs	5

Operations

4. Operations continued as normal this month although a number of sorties were aborted in the central highlands region by NHA TRANG based aircraft due to weather conditions.
5. Several aircraft were fired upon this month, but only one was hit, although on two separate occasions A4-179 was hit once on a scheduled mission in the delta when it was forced low by weather, and once in the highlands. One bullet holed No 6 fuel tank stb wind which resulted in the aircraft being withdrawn from operations for three days whilst being repaired.
6. As the continuing bad weather in 11 Corps area is forcing our aircraft to fly lower than we prefer to, for ground fire avoidance, i.e. 3500 ft to 4000 ft, and the amount of VC activity in this area has increased, we consider ourselves fortunate in having only two bullet strikes in the month.

Training

7. Our one second pilot is continuing to receive valuable and varied experience flying with the four RWS captains.
8. Several practice letdowns have been carried out at DANANG and NHA TRANG when time and traffic have permitted.

Equipment

9. This unit requested the installation of a high frequency SSB transmitter/receiver for ground to air communication with our aircraft. (Our RTFV 2102/P/Eq Pt 3 (128) 5 Jun 65 refers. HASC signal 258/S14 25 Jun suggested that two sets be provided, one as an operational spare, but to date no notification of supply action has been received. A separate submission is being prepared on this subject as it is felt that a SSB net with scheduled listening times at RICHMOND-BUTTERWORTH-UBON and VUNG TAU would fulfill a real need for C130 and Neptune operations as well as for RTFV.

CONFIDENTIAL

.../2.

10. In general the supply system is working satisfactorily and there are no outstanding demands on which supply action has not been advised.

Accommodation

11. The situation regarding accommodation remains the same as indicated in our last report. However, when the airmens' new bar is completed in two to three weeks time this will give additional space for three more beds in the airmens' quarters.

Personnel

12. Whilst it is appreciated that officially the duration of tour at RFFV was set at six to nine months and Depair PS480 dated 16th June 65 confirmed this, Depair PS947 dated 11th June indicated that a large change over was due to commence August 65 and directed that a nominal roll of tourex members commencing August 65 be prepared by this unit. This, and the fact that most recent airmans' postings authorities had stated either "six months approx" or "six months" had led many to believe that they would be repatriated after serving here for six months. Depair PS 481 dated 26th July came as a shock to many particularly to some who had anticipated repatriation around 17th August.

13. To date no replacements have been nominated for Flt Lt G. GODFREY (054101 GD Pilot Medevac 4 Hosp to 3 Hosp wef 7 Aug 65 or A13981 Sgt ROCHFORD J. Clk A who is due to depart here on the 26th August 1965 tourex.

Medical

14. A1554 F Sgt WARD G.B. Eq Asst posted to 3 Hospital Non-Effective will depart SAIGON on the 12th August 1965 by civil airline. There were 64 members who received medical treatment during the month of July. No serious cases of illness were reported although it was necessary to send Flt Lt GODFREY to No 4 Hospital for further treatment.

Accounting

15. A19100 Cpl PETERS E.H. Clk EA arrived on posting on the 23rd July 1965 and with the addition of this member to the HQRS staff it has been possible to rectify most of the matters mentioned in the last report by the Area Inspector of Accounts.

16. A 100% stocktake of equipment revealed two surpluses and one deficiency only. This result is considered to be satisfactory.

17. It is planned in future to carry out a complete stocktake of all stockholdings in four phases during twelve months. The stocktake programme will be submitted to your department for approval.

Aerodrome Defence

18. Arrangements have been made to carry out range practices at least once weekly. This will enable personnel to become fully proficient on all types of weapons currently used here in VIETNAM as well as with their own personal issue weapons. This action has been decided upon because a situation could arise where a person involved in a raid could find himself expended of ammunition or with a broken weapon but find a weapon of a different type available.

Security of Billets

19. The system of RAAF security guards is functioning smoothly. A field telephone system will be installed between the two villas for the use of these guards within the next week.

Correspondence

20. This unit is still awaiting replies to the following correspondence:-

CONFIDENTIAL

-3-

Our File Ref

Subject

1205/1/P3 (21) 26 Jun 65 - Paid/Acting Rank A218262
Cpl (A/Sgt) ST. JOHN R.P. Loadmaster

31/1/Air (27) 16 Jul 65 - Provision of RAAF Courier Service
to RTFV WUNG TAU.

27/1/Air 13 Jul 65 Supply dropping techniques RTFV.

Mail Services

21. Personal postal services between AUSTRALIA and RTFV have not been 100% satisfactory in the past. Arrangements have now been made with the Australian Army Postal Service to handle incoming and outgoing mail for members of RAAF Flight VIETNAM to and from AUSTRALIA commencing 09 Aug 65. It is hoped that a more satisfactory service will be maintained by using this avenue.

22. The address for private mail is:-

NO
RANK
NAME
RAAF FLIGHT VIETNAM
AUSE F.P.O.1
C/- GPO SYDNEY.

23. The following quotation is taken from the "The Reporter" a paper published by United States Army Support Command VIETNAM:-

"FREE MAIL - Free mailing privileges may soon be a reality for all servicemen in VIETNAM. The Pentagon has backed proposals initiated by several congressmen to provide free mailing privileges. Similar services were given servicemen in WWII and the Korean War."

Reports

24. Colonel FLEMING Commander of the 315th Air Commando Group was recently returned to the UNITED STATES tour. In his End of Tour Report he spoke thus of RTFV:-

" THE ROYAL AUSTRALIAN AIR FORCE TRANSPORT FLIGHT - VIETNAM

One of the more pleasant experiences of my tour occurred when the RAAF entered the theatre with a flight of transport aircraft. The excellent short range carrying capabilities of the Australian CV2Bs were effectively woven into the Southeast Asia Airlift System in an atmosphere of complete accord. The experience proved that this aircraft can be effective when properly scheduled and utilised. Comparison of the tonnage lifted by the CV2Bs of the RAAF and those of the ARMY is also revealing, since the RAAF operates within the SEA Airlift System. During a representative month, MARCH 1965, the RAAF hauled 1010 tons with six assigned aircraft while the ARMY hauled 5095 with forty two aircraft."

(D.C. HARVEY)

10th September 1965.

Secretary, Department of Air, Russell Offices, CANBERRA ACT
Commander 2nd Air Division USAF Forces VIETNAM
Air Attache Australian Embassy SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st August 1965 to 31st August 1965.
2. A replacement for Flt Lt G. GODFREY arrived 31st August bringing the pilot strength back to twelve. Flg Off B. BROWN is still at 4 HOSP BUTTERWORTH thus leaving us one pilot below strength.
3. The following are the statistics for August 1965:-

Sorties	810
Hours flown	508 hours 20 minutes
Cargo carried	1,169,484 lbs
Mail carried	10,082 lbs
Passengers	3,799
Medevacs	3

Operations

4. Operations continued as normal this month although continuing bad weather forced some sorties to be abandoned in the delta region and the far north.
5. Several aircraft were fired upon but no hits were sustained.
6. The DANANG based aircraft helped uplift an AUSTRALIAN Special Forces team into a new camp in QUAN NGAI Province. This is the first time that the AUSTRALIAN advisers have operated together as a separate group and we wish them every success.
7. August commenced the second year of RTFV operations. During the first twelve months of operations August 1964 to the end of July 1965 the Flight achieved the following:-

Sorties flown	8722
Hours flown	5762 hours 45 minutes
Cargo carried	15,358,215 lbs
Passengers carried	37,439

Aircraft Maintenance

8. Rebuild work was continued on A4-173 however this work, which is being carried out on a non priority basis, was discontinued about mid month to enable a cycle of "D" servicing's to be carried out on the five on line aircraft A4-179, 191, 193, 208 and 210. Work was recommenced late in the month and it is anticipated that A4-173 will be ready for airtesting during the first week in September.

CONFIDENTIAL

.../2

CONFIDENTIAL

2.

9. Due to non availability of parts no repair work was done on A4-171.

Training

10. Some practice letdowns were carried out at DANANG, NHATRANG and VUNG TAU when time and traffic have permitted.

Equipment

11. Two Pratt and Whitney R2000-7M2 engines and two engine stands have been allotted to this Unit at our request. Already one engine and one stand have been received.

12. This Unit has been advised of procurement action on those demands which have not been satisfied. There are a total of ten only outstanding demands at present and the supply system is presenting no problems.

13. This Unit is still awaiting delivery of quantity one Machine Sewing Zig Zag heavy duty, although advice from ASR MELLEOURNE on 29 Apr 65 stated that CAPO C312231 had been placed on Singer Australia Pty Ltd and delivery could be expected in May 1965. Our letter 2102/1/Eq pt 4(20) to ASR MELLEOURNE has requested further advice as an urgent requirement exists for the item.

Accommodation

14. Although accommodation is still strained at the airmen's villa, the situation will be relieved to a degree when the airmen's bar which is situated in one of the living quarter rooms is moved outside. This action and the provision of double bunks for transients will be completed prior to the next tourex changeover.

Personnel

15. The following personnel were repatriated to Australia on the dates and for the reasons indicated:-

<u>Number</u>	<u>Rank</u>	<u>Name</u>	<u>Branch/Inst</u>	<u>Date</u>	<u>Reason</u>
A1334	FSGT	WARD	C.B. EQASST	12 Aug 65	Medical
A2340	WOFF	BROOKS	H.R. MEDORD	15 Aug 65	"
A13981	SGT	ROCHFORD	J.A. CLKA	26 Aug 65	Tourex

Medical

17. The number of members who received medical treatment during August 1965 was eighty four which was an increase of twenty on the previous month. This increase was due mainly to a mild flu epidemic which affected the majority of Unit personnel to some degree and resulted in some aircrew members being grounded for short periods. By the end of the month the epidemic had passed. The RAAF medical orderly is now treating a number of minor complaints himself in the sick quarters and in the billets without referring them to the US doctors. However, treatment is still recorded on members' medical documents.

CONFIDENTIAL

3.

Accounting

18. The changeover from US dollars to Military Payment Certificates was introduced on the 31st August 1965 and adequate supplies of the new currency are available. Some difficulty has been experienced in converting MPC to piastres (Vietnamese) because of the shortage of the latter currency at official money exchange points. It is expected that this problem will be resolved shortly.

19. Stores accounting is functioning smoothly. Anomalies which were apparent before the arrival of Cpl PETERS CLKRA have now been rectified.

20. V and A checks and monthly stock checks are being carried out and the Accountant Officers work book is submitted to the Commanding Officer at the end of each month for scrutiny.

Aerodrome Defence

21. Range practices are conducted at frequent intervals. The ADIs on strength attend these practices in an instructional capacity and the standard of weapon handling and marksmanship with the small arms available has improved considerably.

22. Members of the Unit have demonstrated that they are well trained to cope with attacks on the airfield. Practice alerts occur approximately twice per month.

Security of Billets

23. One Vietnamese Policeman is on guard at each villa 24 hours per day in addition to the RAAF Security Guards who carry out patrols at the villas during the hours of 2200 to 0600. This protection of billets is considered to be adequate.

Mail Services

24. The Army Postal Service is now handling approximately 95% of personal mail from this Unit. Although incoming mail from Australia is delivered within a reasonable period, 5 to 7 days, considerable delays have been reported in outgoing mail to Australia. In some cases delays of up to 3 weeks have occurred. This matter has been brought to the attention of the SNCO in charge of Army Postal Service, SAIGON and he is investigating the delays.

25. It is interesting to note a paragraph from MACV orders recently published:-

"The Military Pay Act of 1965, Public Law 89 - 132, approved by the President on 21st August 1965, includes provision for free mail service for members of the Armed Forces in Vietnam. The free mail service is effective 1st September 1965".

Happy Thoughts

26. Combat pay, which is paid to all US Servicemen serving in VIETNAM irrespective of their employment, was raised from US \$355 per month to US \$65 per month during August.

(D.C. HARVEY)
Squadron Leader
Commanding Officer

RAAF Transport Flight VIETNAM
AUSF FPO 1
C/-
GPO SYDNEY NSW

8th November 1965

Secretary, Department of Air, Russell Offices, CANBERRA ACT
Commander 2nd Air Division USAF Forces VIETNAM
Air Attache Australian Embassy SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st October to 31st October 1965.
2. Flying Officer G.L. MORTON was medevaced from No 4 RAAF Hospital BUTTERWORTH to AUSTRALIA and thus the Unit is still one pilot under strength. Flight Lieutenant G GODFREY and Flying Officer F.W. PIKE arrived to replace Flying Officer M.H. MARSH and Flying Officer G.I. LUMSDEN who returned to AUSTRALIA on completion of their eight months tour with this Unit.
3. The following are the flying statistics for October 1965:-

Sorties	740
Hours flown	466.15
Cargo Carried	1,018,629 lbs
Mail Carried	22,150 lbs
Passengers	4,536
Medevacs	1

Operations

4. Operations continued as normal this month although at times they were restricted in the northern part of the country due to weather. The weather in the delta however has improved and caused no curtailment to operations in the area.
5. Several aircraft were fired upon during the month, two aircraft sustaining hits. A4-173 received a bullet through the port wing tip which severed the wiring to the J2 compass detector unit. A4-208 sustained a hit through the forward cabin floor, the bullet passing through the floor and exiting through the exhaust system of the cabin heater in the roof. A Vietnamese Army passenger was severely injured in the knee as the bullet passed through the aircraft. The aircraft was flying at low level beneath weather, endeavouring to make a landing at BAO when the hit was received.

Equipment

6. The movement of equipment between Base Squadron BUTTERWORTH and RFFV is sometimes delayed due to the lack of a regular courier service between the two units, some of these delays have been up to six weeks.

...../2

CONFIDENTIAL

7. There has been a shortage of spare P & W R2000 engines and at one stage the Unit had one spare engine only. Representations have been made to the 386th Transportation Detachment for the supply of more of these engines which, it is hoped, will be forthcoming in the near future.

Personnel

8. Personnel movements on posting to and from the Unit were as follows.

9. It is requested that passports of members proceeding to this Unit contain a visa to enter the PHILLIPINES as in the event of No 3 Field Hospital in SAIGON being full, members would have to be sent to Clark Field Hospital. The passports of members arriving have not contained this visa.

Communications

10. The teleprinter which has been installed is operating effectively and has speeded up communications from here to AUSTRALIA and BUTTERWORTH. There are occasional breakdowns which are rectified by American Technicians.

Pay

11. The AUSTRALIAN Army at BIEN HOA is now paying RAAF member of No 161 Reconnaissance Flight at BIEN HOA. When pay or allowance variations are necessary, paybooks are returned to this Unit and adjustments are made by the CLKFA.

Mail Services

12. All unclassified official mail is now being sent through AUSTRALIAN Army Field Post Office, SAIGON. It appears that delivery takes from six to nine days. Private mail takes approximately the same time.

Transport

13. Our 4/1/Air(62) dated 16th October 1965 contained a request for the provision of a station wagon for use in the SAIGON area. The matter was also discussed with Group Captain WEARNE when he visited the Unit. This is an urgent requirement and your early action would be appreciated.

14. The running transport provided by the Americans at VUNG TAU leaves a lot to be desired and the Jeeps in particular, being very old models, have continual mechanical failures. A request has been made to 755th Transportation Battalion for the provision of new vehicles but the reply has indicated that it will be several months before they can be made available.

Medical

15. During the month of October 1965, 65 members were treated for minor complaints. One member was admitted to No 3 Field Hospital on the 27th October 1965 for pathological test for renal or cardiac condition. He was medevacated to No 4 Hospital, BUTTERWORTH on the 29th October 1965 and it is understood he has since been sent back to AUSTRALIA.

16. There have been no serious outbreaks of skin diseases or other illnesses, apart from the normal cases of Diarrhea, but even this complaint has been less prevalent during the month.

Presentations

17. On the evening of Saturday 16th October 1965 all officers of the Flight were entertained at the USAF Open Mess TAN SON NHUT by Colonel HANNAH Jr and officers of Headquarters 315th Air Commando Group. The evening was most enjoyable and it is felt that the good relationship already existing between the two Services was further improved. During the evening Colonel HANNAH presented a plaque to the Unit inscribed "Presented in grateful appreciation of outstanding service rendered by RAAF Transport Flight, VIETNAM from the 315th Air Commando Group TC". (Photo Attached).

18. A plaque of similar design was presented to the Commanding Officer Squadron Leader D.C. HARVEY.

Happy Thoughts

19. With the approach of Christmas numerous personnel of the Flight are faced with quite a problem in selecting Christmas gifts for their wives and children. Many suitable items are available locally but, unfortunately the AUSTRALIAN Customs regulations permit gifts free of customs duty to a maximum value of £A12 in any one year to be sent home. Under normal conditions it is not unusual for a family man to spend approximately £A5 on a present for each child and considerably more than that on a present for his wife.

20. It is interesting to note the United States Government's attitude to this problem. Extracts from US Customs Requirements are quoted:

para 2 states

"All merchandise is subject to customs duty unless exceptions are specifically provided. Exceptions are bona fide gifts under \$10.00 mailed by military and authorized civilian personnel. Bona fide gifts are those made in good faith; they are genuine gifts and do not include those purchased with funds supplied by others,

CONFIDENTIAL

-4-

or items intended for personal use of the sender upon his return".

para 4(a) states:

"Bona fide gifts not exceeding ten dollars in "fair retail" value mailed by authorized military and civilian users of APO's. Value refers to aggregate value received by any one addressee during one day".

(D.C. HARVEY)

Air Attache Australian Embassy, SAIGON VIETNAM

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st November to 30th November 1965.

2. Squadron Leader V.D. GUTHRIE, AFC, assumed command of the Flight from Squadron Leader B.C. HARVEY, DFC, AFC, who returned to AUSTRALIA, waf 24th November 1965. Flying Officer W.D. BAGGOTT, Flying Officer C.J. GERAGHTY and Flying Officer T.R. BERRIDGE also returned to AUSTRALIA on completion of tour and were replaced by Flying Officer P. YATES, Flying Officer G.J. KIMBERLEY, Flying Officer J. VANDERSTEEGE and Flight Lieutenant I.W. BELLAMY. The Unit is now up to strength in pilots and the arrival of Flight Lieutenant BELLAMY has satisfied a long felt need for a QFI in the Flight.

3. The following are the flying statistics for November 1965:-

Sorties	774
Hours flown	480.50
Cargo carried	1,301,122 lbs
Mail carried	16,037 lbs
Passengers	4,174

Operations

4. Operations continued as normal this month although the continuing monsoonal weather in the northern part of the country restricted some flying in that area.

5. Several aircraft were fired upon during the month but only one hit was sustained. A4-208 was flying in heavy rain just below cloud base at 2000 feet enroute to HAI YEN in the delta. The bullet entered just behind the nose wheel doors and after entering the rear cockpit passed through the esky ice box. Apart from skin repairs no damage was sustained except to the loadmasters feelings who happened to be sitting on the box at the time.

Training

6. Flt Lt I.W. BELLAMY renewed Plt Off R.A. MCKENZIE'S instrument rating and carried out a general flying check on him. It is expected that additional general flying checks will be carried out on other pilots as the time and opportunity arises.

CONFIDENTIAL

-2-

Equipment

7. The non availability of reconditioned engines from US Army sources continues to be a cause for concern. Currently we are holding one serviceable power egg. The Flight is EDP (AOG) for two engines for A4-171 and repair of this aircraft is imminent. Additionally there are four engines fitted to aircraft in excess of 1000 hours. Anyone of these engines could well require replacement at any time. Engines from US sources are supplied bare and build up to power egg for installation is time consuming and dependant upon availability of component parts. An embarrassing situation could arise at any time unless we obtain a minimum quantity of two power eggs promptly from AUSTRALIAN sources. My priority signal T100 dated 26th November 1965 refers.

8. Additional to the shortage of engines, the overall spares situation is deteriorating rapidly. With the projected arrival of an additional 52 Caribou Aircraft it is envisaged that the position could worsen and this Flight may be forced to request support from AUSTRALIAN sources.

9. Advice has been received that item 3530-PH-47K1 Machine Zig Zag Heavy Duty has arrived in AUSTRALIA. Therefore delivery to this Unit can be expected sometime in December 1965.

10. Outstanding demands from RAAF sources total ten but in all cases procurement action has been advised.

Personnel

11. Personnel movements on posting to and from the Unit were as follows:-

12. The repatriation of tourex personnel is proceeding smoothly. Outward and inward posting advices are now being received in sufficient time to enable administrative and domestic arrangements to be made, and this has in no small way improved the morale of members of the Unit. Your continued co-operation in this regard would be appreciated.

No. 161 Reconnaissance Flight

13. RAAF members of this Flight are on the posted strength of RTFV for administrative, pay and disciplinary purposes, although they are under the functional control of the OC No. 161 Recce Flight.

14. This arrangement has proved most difficult because of the inadequacy of communications between BIEN HOA and VUNG TAU and also the problem of travel between the two bases, which is only possible by air.

15. Under the present system, whereby the CO RTFV is CO for disciplinary purposes of RAAF members of No. 161 Recce Flight, it is necessary for him to travel to BIEN HOA to hear any minor or major charge or alternatively to bring the member concerned to VUNG TAU. In both cases this is a most time consuming procedure involving approximately two days.

16. The undersirability of this arrangement has already been mentioned in para 5 of our letter 3/2/Air(7) dated 23rd November 1965. Although the posting of a RAAF Officer to No. 161 Recce Flight would partly relieve the problem it is considered that the only satisfactory arrangement would be for all RAAF members of No. 161 Recce Flight to be seconded to the Army for the duration of their tour in SOUTH VIETNAM.

Communications

17. A large percentage of messages from AUSTRALIA received through the American communication system have taken up to ten days to reach this Unit and it is presumed that the same applies to outgoing messages.

18. Although there is a teleprinter link between RTFV and mainland Units through AAFV SAIGON, this method is by no means reliable owing to the frequent breakdowns in the circuit, caused by power failures.

19. The installation of additional power plants is under way at the VUNG TAU airfield and it is hoped that with the extra power available the teleprinter link will prove more satisfactory.

Defence

20. During the past month there were several alerts of impending attacks on the VUNG TAU airfield and the Villas. In some cases Viet Cong were sighted within two kilometres of the VUNG TAU village.
21. All members have been thoroughly briefed on the action to be taken during an alert and on the occasions mentioned the reaction was satisfactory.
22. Small arms training is still being continued and with the standard achieved in the handling of these weapons members of the Flight should be able to acquit themselves well in the event of an actual attack.

Transport

23. The Air Attache, SAIGON has received approval to purchase a Volkswagen Minibus for the use of our WOFF MED ORD and FSOT EQASST who are based in the SAIGON area. The availability of this vehicle will enable these members to carry out their duties more efficiently and expeditiously as well as providing transport for other members whose duties take them to SAIGON.

Currency

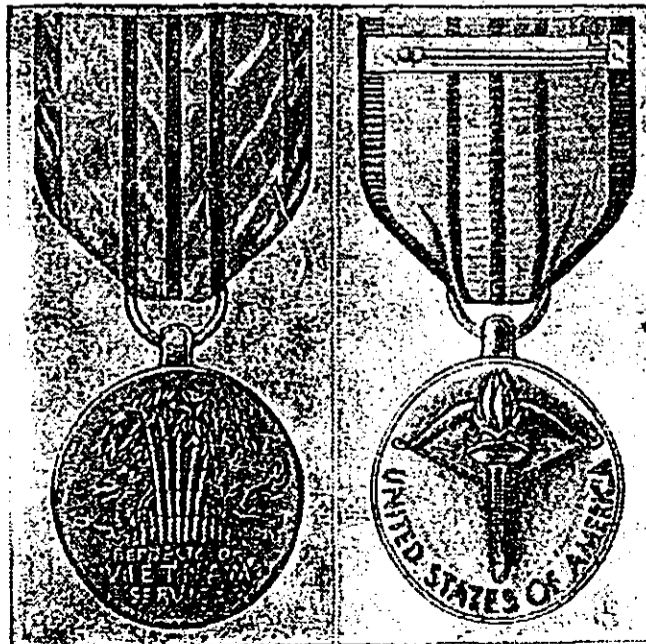

24. Many members who arrive at this Unit either on attachment or posting seem to be unaware that AUSTRALIAN currency is not negotiable in this country. There are no facilities at this Unit or anywhere else in SOUTH VIETNAM to convert AUSTRALIAN to local currency and it would be appreciated if DEPAIR directive 3/65 could be amended to include instructions that, prior to proceeding to this country, members are to convert AUSTRALIAN currency to US dollars.

Mail

25. The Unit has been successful in obtaining a Cones to hold outgoing and incoming mail. It is now installed at a convenient position at the TAN SON NHUT air base and has solved the problem mentioned in para 19 of our monthly report dated the 6th October 1965.
26. Under the present system official mail up to the security grading "Restricted" is sent through the Australian Army Field Post Office. It is suggested that "Confidential" mail could also be sent by this method.

Campaign Medals

27. Although this Unit has made many requests for an award of a campaign medal to members of RTFW, no such award has been forthcoming.
28. Hereunder is an illustration from a local newspaper of a Vietnamese Service Medal which will be awarded to members of the US Forces who serve in VIETNAM.

.. /5

VIETNAM SERVICE MEDAL — Here is the design for the Vietnam Service Medal established by the Department of Defense. The medal may be awarded to members of the U.S. Armed Forces who have served in Vietnam and designated contiguous waters, and air space thereover, since July 3, 1965. The front of the disc-shaped bronze medal shows a cluster of bamboo trees superimposed on a traditional

29. It is felt that the issue of a campaign medal of this nature to members of the Flight who are serving under wartime conditions would be most appropriate.

Medical

30. Sixty four members were treated for minor complaints during November 1965. Two members were medevacuated to No. 4 Hospital, BUTTERWORTH one suffering from a gunshot wound in the leg and the other from venereal disease.

31. The Director General of Medical Services visited the Unit during the month and, having regard to the conditions under which we operate, appeared to be satisfied with the general state of health and hygiene.

32. The standard of health is high at present. Approximately fifty per cent of the Flight changeover has occurred and the freshness in mental outlook of the new arrivals by comparison to that of the "old hands" is very noticeable.

33. During the past twelve months there have been no incidents of malaria among members of the Unit. There have been only two cases reported by the US Forces in the VUNG TAU area.

34. Chloroquine Primaquine tablets comprising chloroquine phosphate USP 500 mgm and primaquine phosphate USP 79 mgm are being used as a malaria prophylaxis. These tablets are also supplied to No. 161 Recce Flight.

35. The venereal disease rate for the month was 6 VDG. One member who was due for rotation was medevacuated to No. 4 Hospital with LGV for further treatment (see Para 30).

36. Some of the rooms at both Villas are infested with bed bugs and the Swing Fog Spray which is now a scaled item of the Unit is urgently required to eliminate these and other pests.

RAAF TRANSPORT FLIGHT
MONTHLY REPORT

Introduction

1. This report covers the operations of RAAF Transport Flight VIETNAM from 1st December 1965 to 31st December 1965.
2. Flight Lieutenant D.M. COOPER and Flying Officer J.D. GRIERSON returned to AUSTRALIA on completion of tour and were replaced by Flight Lieutenant M.L. PERRETT and Pilot Officer R.W.J. COOPER.
3. The Flight continued operations over the period 25th - 27th December.
4. The following are the flying statistics for December 1965:-

Sorties	768
Hours flown	492.55
Cargo carried	1,156,332 lbs
Mail carried	45,042 lbs
Passengers	4.695
5. Since the Flight commenced operations in JULY 1964 it has recorded the following achievements:-

JULY 1964 to 31DEC65

<u>Hours Flown</u>	<u>Freight Carried</u>	<u>Mail Carried</u>	<u>Passengers</u>	<u>Sorties</u>
8214.50	21,653,013 lbs	114,913 lbs	59,325	12,670

Training

6. Flt Lt A.H. ABBOTT was raised to "Green Card" and endorsed as a Right Hand Seat Check Captain. Flg Off G.A. NICHOLSON was also upgraded to RHS Check Captain. Monthly Continuation Training is not possible because of the high rate of Flight effort, however normal operations within the area, and the rate of flying, keep the standard of flying at a high level.

Operations

7. With the new build up in the ground war activities more anti-aircraft small arms fire has been encountered. More and more hits are being recorded on aircraft as VC gunners become more accurate. Only two RAAF aircraft were hit during the month.

CONFIDENTIAL

CONFIDENTIAL

-2-

On Wednesday 27th December Flying Officers PIKE and YATES were returning from a mission south west of DA NANG when low cloud forced the aircraft down to tree top height. About fifteen miles from DA NANG the aircraft ran into a hail of VC fire and was subject to small arms fire for approximately 4 minutes. Five bullet strikes were recorded on the aircraft, one bullet struck and severed the rudder cable. The aircraft was safely landed at DA NANG and was back in operations at first light the following morning.

8. As the bad weather continues in the DA NANG and NATRANG areas our aircraft are forced to fly lower than captains prefer to, for ground fire avoidance, and we can consider ourselves fortunate in having only two bullet strikes for the month.

9. Intelligence reports indicate that strikes recorded on AMERICAN aircraft during the month were twice that on any previous month.

Operational Intelligence

10. General Viet Cong Activity. The trend of VC activity during December, continued to increase, reaching a peak with regard to size of units being committed for battle.

11. On 15th December 1965, intelligence reported that in two days fighting the AMERICAN and VIETNAMESE forces had killed an estimated 500 VC in three separate operations.

12. A Government search and destroy mission 75 miles south of SAIGON resulted in 106 VC dead.

13. In QUANG TIN Province, 198 VC were killed the same day whilst in the GO CONG province some 181 VC bodies were counted after a bloody battle lasting two days.

14. Terrorist Activities. The VC have stepped up their terrorist activities during the month, one hotel being blown up in SAIGON whilst hand grenade and home made bombs have been thrown into AMERICAN groups causing many casualties.

15. On 28th December 1965 a hotel in DALAT was badly damaged by a bomb blast which killed one AMERICAN and injured 40 others.

16. During the Christmas and New Year period much stricter security precautions have been taken in both RAAF Villas.

17. The Viet Cong attacked a section of SAIGON with mortar and heavy automatic arms fire a few minutes before midnight on Saturday, 25th December 1965.

18. The mortar rounds were fired into CHOLON suburb which is less than 4 miles from the heart of the city.

19. Anti-Aircraft. Reports have been received from intelligence that a specialist hardcore VC anti-aircraft regiment is now active in the Delta and Central Provinces and their latest weapons include 12.7 anti-aircraft guns.

Equipment

20. It has been necessary, during the month of December, to place demands on RAAF Depots for engines, propellers and other technical spares which are unavailable from American supply sources.

...../3

CONFIDENTIAL

CONFIDENTIAL

-3-

21. With the arrival of four more companies of Caribou in the country, two at VUNG TAU, it is anticipated that the spares situation could deteriorate still further. In this case the only way to maintain our aircraft in an airworthy condition is by obtaining engines and spares from AUSTRALIA.

Personnel

22. Personnel movements on posting to and from the Unit were as follows:-

OUTWARDS

23. Outward posting advices have not yet been received for Flt Lt A.H. ABBOTT (055138) and Plt Off R.A. MCKERNAN (0318898) both GDPLTs although their replacements have been posted in wef 1st February 1966.

Campaign Medals

24. Advice that the 1962 General Service Medal with the VIETNAM Clasp isto be awarded to members of RFFV was welcomed by the Unit.

25. This award will satisfy the requirement to acknowledge the service of members in SOUTH VIETNAM during the period of hostilities.

DEFENSE

26. A system has been introduced whereby all members of the Unit attend range practice once per month. In this manner it is hoped to maintain a high standard of proficiency in the use of small arms.

...../4

CONFIDENTIAL

CONFIDENTIAL

-4-

27. There were several alerts at the VUNG TAU airbase during the month and on one occasion a force of sixteen hostile junks was discovered heading for the area. In no case was penetration effected by the Viet Cong.

Loss of Equipment through Enemy Action

28. On the 4th December 1965 the Metropole Hotel in SAIGON was bombed by Viet Cong terrorists. A21232 PMSGT BEAGLE R EQASST who was billeted in the hotel was fortunately in VUNG TAU at the time. Considerable damage was done to the hotel and this member lost several personal and service items. A claim has been submitted thru the Unit for compensation for this loss.

Cost of Living

29. The cost of living in VUNG TAU continues to increase. Meals in local cafes are now at least twice the price they were three months ago.

30. A periodic review of allowances in VIETNAM is considered warranted to prevent hardship to members who are obliged to feed themselves on the allowance given.

Transport

31. The Unit is still awaiting the arrival of the Volkswagen Minibus which has to be obtained in AUSTRALIA. Urgent procurement action to obtain this vehicle is requested for the reasons outlined in our previous correspondence.

Leave Entitlements

32. A submission was made to DEPAIR under cover of our 1219/1/P3(106) dated 29th September 1965 that members of RTFV be compensated for the extra days worked during their tour in SOUTH VIETNAM by the grant of additional leave or payment in lieu of same. No decision has been received on this matter and your advice would be appreciated. In this regard it is considered that the entitlement should apply to all members who have served at the Unit.

Outfit Allowance

33. The subject of Outfit Allowance entitlement was raised in our 1903/5/Acta(112) dated 23rd November 1965.

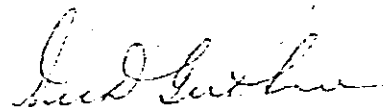

34. No reply has been received to this letter which requested advice as to whether or not a total 40 allowance is payable to members who proceed to RTFV on posting. An early reply to our correspondence is requested.

Medical

35. Fifty Six members were treated for minor complaints during the month. There were no medevacs.

36. There were four cases of venereal disease by comparison with six cases during the previous month.

37. On the medical side this was an uneventful month with no serious out breaks of disease. General health and hygiene remained at a fairly high level. Most illnesses were upper respiratory track infections and diarrhaea.
