NO 35 SQUADRON DOCUMENT IS DECLASSIFIED AND AVAILABLE
FOR PUBLIC USE BY AUTHORITY, CHIEF OF THE AIR

COMMANDING OFFICER'S REPORT

JANUARY 1969

File No.

Introduction

1. This report covers the activities of No 35 Squadron during the month of January 1969.

Operational Achievements

2. Work Done. Following are the statistics of the work done for the month:-

Sorties	1147
Hours	499.55
Passengers	9472
Freight	1,447,172 lbs
Mail	290,491 lbs

3. Hours Summary. The following table sums up the flying hours.

	January	1968/69
Planned	510	3510
Achieved	499.55	3537.55

Operations

4. Harassing tactics by the enemy using rockets and mortars have made January an uncomfortable month. Vung Tau itself was attacked by rockets; the 834th Air Division lost one C130 to mortar attack and one C7 received the equivalent of category 4 damage as a result of enemy ground fire. One No 35 Squadron Caribou sustained Category 2 damage from mortar fire.

5. Damage to A4-208. No 35 Squadron Caribou A4-208 was attacked by mortar fire as it entered the parking area of KATUM, South Vietnam. The aircraft was crewed as follows:-

Captain:	0316968	Flt Lt	R.J. THOMPSON
Co-Pilot:	0314134	Flg Off	R.J. MCGREGOR
Loadmaster:	A219151	Col	GRACE B.T.

The captain received two superficial lacerations, but after initial treatment his medical category remained A1-G1-Z1. The aircraft sustained 111 shrapnel holes in the wing and fuselage, both windcreens were badly damaged, two tyres were blown and a hydraulic line was holed. During a lull in the attack, the captain flew the aircraft off and landed at Bien Hoa. His skill in handling his damaged aircraft and in dealing with the hydraulic failures he encountered is commended.

6. Weather. The weather has remained fine and clear throughout January. Strong south-easterly winds prevail at Vung Tau, and this has frequently restricted operations to the short south-east runway. On these occasions ground traffic becomes confused through lack of taxiways, causing delays and extended ground running times.

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~
UNCLASSIFIED

- 2 -

7. Nature of Missions. The scheduled missions 003, 005, and 006 continued normally. The 002 and 001 missions were devoted to short sorties giving logistic support for forward airfields in the delta region. This resulted in a record for the squadron in Vietnam as to freight carried and total sorties flown.

Aircrew

8. Flying Training. Operational activity precluded specific flying training missions. Some training in emergencies and instrument flying was carried out during recovery sorties, however, and it was possible to carry out three instrument rating tests. Three pilots were upgraded from White to Green instrument rating.

9. Individual Efforts. One complete crew was detained in Manila on temporary duty for a full week. In addition the squadron was short one pilot for 17 days, owing to an unexpected posting; and one loadmaster for 14 days, owing to sickness and R & R leave. These shortages coupled with the considerable amount of operational work done, imposed an enormous load on the remaining aircrew. Six pilots exceeded 100 hours flying for the month. However, particular commendations are due to three loadmasters. Their individual efforts are recorded:-

			Hours	Sorties
A219151	Cpl	GRACIE B.T.	143.05	234
A218593	Cpl	SHARAN B.A.	134.35	238
A45006	Cpl	LOVELL D.	135.45	245

These figures can only partly portray the work involved. Each of these airmen willingly handled all manner of awkward, dirty, and heavy cargoes; and yet cheerfully played host to a multitude of passengers. They deserve more than 50 cents a day flying pay.

Technical

10. A4-173 returned from 'E' Servicing by Phillipines Air Lines, Manila. The squadron aircraft strength now stands at seven. This state should continue until May when the next 'E' Servicing falls due.

11. The average serviceability was 84.7%, with a serviceable and not flown figure of 23.1%.

12. The extensive repairs to the battle damage sustained by A4-208 were carried out in seven days. A first-class effort by Technical Flight; but particularly by the Aircraft Metal Workers. Unfortunately a number of spares have proved difficult to obtain, and the aircraft as a whole remains unserviceable.

Administration and Equipment

13. Equipment. Apart from one outstanding GNOR's (AOG) demand, technical spares support from the USAF was satisfactory. The small number of demands through Australian sources were satisfactorily filled. A scaling review was initiated; it is expected to be completed by the end of February.

14. Liaison Visit by Commanding Officer. The Commanding Officer carried out a liaison visit to Cam Ranh Bay from 26 - 28th January 1969 at the invitation of the Commander No 483rd Tactical Airlift Wing. The 483rd Tactical Airlift Wing operates all USAF Caribous in Vietnam, and provides technical and general parts support to No 35 Squadron.

15. The visit achieved the following:-

- a. Established lines of communication on flying safety, operational procedures, and intelligence matters.

~~CONFIDENTIAL~~

/b.

~~CONFIDENTIAL~~

- 3 -

- b. Established a personal working relationship with the staff officers who provide No 35 Squadron with direct technical and general parts support.
- c. Specifically, established a new and more satisfactory basis for the servicing of TACAN. In the past this has created some considerable problems.

Morale

16. Hard work as a team is always conducive to high morale. Thus the extra work carried out by the squadron, both operationally and in the repairs to the battle damaged aircraft, can be seen reflected in the general squadron spirit.

17. Worthy of mention was the compassionate repatriation of a squadron member during the month. The officer concerned approached the Commanding Officer with a pressing personal problem. The circumstances were referred to Department of Air by signal, with a request for investigation and advice. Twenty-six hours later a signal containing a posting advice was received back at the squadron. Fourteen hours later again, the officer was on his way home. This sort of backing from the home front gives confidence and resolve to all members here, and is a significant factor in the maintenance of morale.

VUNG TAU
4th February 1969

B. Seedman
(B. SEEDSMAN)
Squadron Leader
Commanding Officer

No 35 SQUADRON

COMMANDING OFFICER'S REPORT

FEBRUARY 1969

File No. _____

Introduction

1. This report covers the activities of No 35 Squadron during the month of February 1969.

Operational Achievements

2. Work Done. Following are the statistics of the work done for the month:-

Sorties	1,146
Hours	490.25
Passengers	9,685
Freight	1,384,062
Mail	243,738

3. Hours Summary. The following table sums up the flying hours:-

	February	1968/69
Planned	461	3994
Achieved	490.25	4028.20

Operations

4. General. February was again a very busy month for the squadron. In addition to the standard scheduled services, 40 missions were flown on over 500 sorties providing air supply of FOL and ammunition to forward airfields in the IV Corps area, and 90 sorties were flown in support of 1ATF operations at Long Binh.

5. Effects of High Sortie Rate. The statistics at para 2 and 3 do not adequately convey the intensity of activity of these operations. An average mission in IV Corps involves 12 hours of aircraft operation for a total of only 5 flying hours. Apart from the initial positioning and the return to base, the average sortie length is only 15 minutes. The aircraft is loaded and unloaded at least 14 times, it is refuelled and serviced four times. The daily mission in support of the ATF component at Long Binh is equally demanding, involving 8 sorties and only 2½ flying hours. The high sortie rate is accompanied by a disproportionately large and unaccounted ground running time; and it causes the engines to be run at either take-off or HATO power for some 25% of the time airborne. For a given number of flying hours, all aircraft systems are operated more often; tyres, brakes, and undercarriage are subjected to abnormal wear and tear from more frequent use. In sum, the nature of these operations places strenuous demands on aircrews, aircraft, and on technical and general parts support.

6. Communications Problem. Now that all USAF C-130s have been equipped with the AM/ARC 54 FM installation, nearly all the airfield operating agencies in IV Corps are working FM frequencies outside the range of No 35 Squadron's AM/ARC 44. During February the squadron had to reject a number of tasks ordered by the 7th Air Force because of this problem, but on numerous missions the squadron did fly it remained an operational hazard. No 35 Squadron 2546/3/Tech(30) dated 8th February 1969 to RAHQ-V details this operational difficulty.

CONFIDENTIAL

/s/ _____

~~CONFIDENTIAL~~
UNCLASSIFIED

Aircrew

7. Proficiency. Two pilots were upgraded to Category B, bringing to seven the number of squadron pilots so graded. A Category B pilot is deemed worthy to be authorised to carry out any operational task the squadron may be called upon to do.

8. Work Load. Most aircrew flew well over 100 hours again this month. On an average, this entailed working five 12 hour duty days each week, plus one day on standby. All members are being closely observed for signs of strain or fatigue, but no adverse effects have been noted to date.

Technical

9. The average serviceability was 76.5%. The serviceable and not flown percentage was 15.8%. On four days, five aircraft plus a standby were ordered, and on six days four aircraft plus a standby were ordered. All these demands were met; and in addition, three 'D' Servicings and two engine changes were carried out.

10. Radio Servicing. TACAN unserviceabilities have almost disappeared since 483rd TAW took over repair and overhaul of this equipment at the end of January. As a result of arrangements made by RAAFHQAFV in February, all radio equipment is now being serviced by 483rd TAW. The benefit of this arrangement will not be evident until next month, but a vast over-all improvement is expected.

Equipment

11. It is becoming increasingly difficult to obtain technical spares from USAF sources. There are two main problem areas:-

- a. Supply Point Holdings. Supply point holdings of certain items are inadequate in the airframe and engine range, occasioning GNORS and ANORS demands with delays of up to fourteen days to satisfaction. 53 GNORS demands were submitted; this did not assist the average serviceability rate.
- b. Bench Stock. Bench Stock items gradually were reduced in range until in the middle of the month it was necessary to request that 148 items be re-included in the stock. At present only 279 of 333 authorised items are held, and 13% of all demands in February were for bench stock. These problems have developed since mid - January; prior to this supply was excellent. The matter has been taken up with 536th TAS, the supply agent.

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

MARCH 1969

Introduction

1. This report covers the activities of No 35 Squadron during the month of March 1969.

Operational Achievements

2. Work Done. Following are the statistics of the work done for the month

Sorties	1,333
Hours	538.30
Passengers	12,051
Freight	1,386,982
Mail	279,552

3. Hours Summary. The following table sums up the flying hours:-

	March	1968/69
Planned	509.30	4503.55
Achieved	538.30	4566.50

4. General. The nature of operations has been such that the upward trend in efficient aircraft usage continued this month. Although there was a slight overfly on hours, an all time record of sorties flown and total loads carried was achieved. Generally operations were similar to those of recent months, but with the addition of the air transport support of the 1 ATF deployment at Long Binh.

Operations

5. 1 ATF Support. The squadron flew 69 hours on 250 sorties in priority support of 1 ATF operations at Long Binh. 1 ATF was unable to forecast its probable withdrawal date at the beginning of the month, but some estimate had to be made in order to advise the US 7th Air Force of the air transport support it could expect for Mekong Delta logistics. In fact 1 ATF maintained its deployed force at Long Binh throughout the month. However both commitments were met, with a resulting overfly of 29 hours.

6. Mekong Delta Logistics. The 7th Air Force 834th Air Division divides its Caribou air transport support into scheduled services, dedicated services, and common service. Scheduled and dedicated services are devoted to specific routes or organizations and support the bulk of users; but there are numerous small units and units requiring only occasional SRT support which must be specially provided for on demand. Out of 49 missions provided daily by the USAF, only six are allocated to common service to meet these specific demands. No 35 Squadron allocates one mission every day to common service, and where possible two. These missions are almost invariably employed in shuttling POL and ammunition to forward

~~CONFIDENTIAL~~ **UNCLASSIFIED**

A-100

~~CONFIDENTIAL~~

- 2 -

bases in the Mekong Delta. In February, an average month for common service, these missions accounted for 469 sorties, 207 hours, and lifted over one million pounds of freight. This contribution is a significant factor in common service logistics.

Technical

7. The effect on maintenance of the current high sortie rate was raised in the February monthly report; yet throughout March, Technical Flight has maintained the serviceability rate at an incredible 85.2%. Because of the nature of operations, flying time only is recorded; it is noteworthy that actual engine running times for the month totalled 708 hours. The serviceable and not flown figure was 27.1%.

8. FM Radio Modification. The lack of an adequate FM radio remains a communications problem and an operational hazard. If work does not commence on Caribou Modification No 79 almost immediately, the squadron will be saddled with the additional problem of having to operate one aircraft below strength while the modification is carried out. As detailed in our 2546/3/Tech(30) dated 8th February 1969, the squadron holds one additional aircraft on strength from late January until 25th May 1969 when A4-193 is allocated off for 'E' Inspection. This was the time within which the modification should have been completed. Already two of the four months available have passed and the squadron still has no indication as to when work may commence.

Equipment

9. The supply of technical spares through the USAF system improved notably during the month. Bench stock holdings increased to 83%, and the 148 additional items requested in February were supplied. Only 17 GNORS demands were submitted. This in itself shows that the supply point holdings have increased, and the GNORS demands were filled in an average of 1.9 days.

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

APRIL 1969

Introduction

1. This report covers the activities of No 35 Squadron during the month of April 1969.

Operational Achievements

2. Work Done. Following are the statistics of the work done for the month:-

Sorties	1072
Hours	441.35 Hours
Passengers	10168
Freight	1158449 lbs
Mail	230006 lbs

3. Hours Summary. The following table sums up the flying hours:-

	April	1968/69
Planned	450.00	4996.55
Achieved	441.35	5007.45

4. General. A lower flying rate was planned for April. This gave both ground and air crews a rest after the hectic month of March, and it served to adjust the progressive flying rate for the fiscal year. Despite this, load figures remained well above average, with over ten thousand passengers and a million pounds of freight carried.

Operations

5. Weather. Winds have been gradually veering south as the monsoon season approaches. The diurnal cloud build-ups over the highlands are beginning to affect operations: GIÁ NGHIA had to be overflown twice on scheduled missions. Isolated heavy rain has fallen in the Delta, and cloud build-ups frequently hamper operations; however all missions were completed.

6. General. Operations in support of No 1 ATF at LONG BINH ceased on 7th April. Since then all operations outside the scheduled services have been in the Mekong Delta. Major friendly offensive action has continued in the Delta, and Caribou aircraft have been in demand to supply the helicopters supporting the troops in the field.

Maintenance

7. Ground Support Equipment. Much of the ground support equipment is showing signs of long use in the extreme climatic conditions. All but one of the aircraft ground power units are now unrepairable. The usable unit is just holding together, and it can only be hoped that it will last until the demands for replacements have been filled. The fork lift is only partly usable, owing to the lack of spares. The aircraft hydraulic test rig is always breaking down.

~~UNCLASSIFIED~~

UNCLASIFIED

- 2 -

Dust, humidity, and long use are taking their toll. Details are:-

- a. There are 24 outstanding demands for the forklift dating back to our VOR 17/69 (6507/113737A) and our VOR 18/69 (6507/100205A) both of 30JAN69.
- b. Most outstanding Wausheka demand, our EOS 29/69 (6115-511-2210) dated 20FEB69.
- c. The hydraulic test rig is being inspected this month to see whether a replacement might not be more economical than maintenance.

8. Air Incident Reports. Eleven AIRS were raised on aircraft unserviceabilities which occurred away from base. Most of these incidents were random material failures which unfortunately coincided in the one month. However there were a number of distributor high-tension lead failures, and action is being taken to guard against further similar break-downs.

Equipment

9. The supply situation through JMS sources has continued to improve. The satisfaction rate on GORS demands now stands at 1.4 days, and bench stock holdings are up to 89%.

Administration

10. The Commanding Officer attended a conference sponsored by the 834th Air Division and attended by representatives of all Caribou and Provider (C-123) squadrons in Vietnam. The conference was nominally a Procedures Standardization Conference, but in fact it became a forum for problems encountered in the in-country airlift. Most of the matters discussed were of passing interest only, with one note-worthy exception: it was quite evident that the established tasking organization is slow and inflexible when urgent airlift is required.

11. MACV Task Organization. All military transport, whether land, sea, or air, is requested through the Transportation Management Agency (TMA). The sheer size of such an organization makes it unwieldy to deal with priority air transport requests. A priority 1 request may be filled in four days; a priority 3 request will take 14 days. When airlift of Combat Essential or higher priority is required, it is necessary for the Tactical Airlift Liaison Officer (TALO) in the field to order the airlift direct from the 834th Air Division. The TALO is ostensibly in the field to advise the army commander on airlift matters. In fact he is the army commander's direct link to the 834th AD control post. Thus a de facto ATOC has been established, although there is no provision for one in the organization.

12. Works. The headquarters building has been completely relined and air-conditioned. All the upstairs offices and sections in the maintenance hangar are now air-conditioned. While our surroundings are not exactly palatial, at least they are becoming comfortable.

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

MAY 1969

Introduction

1. This report covers the activities on No 35 Squadron during the month of May 1969.

Operational Achievements

2. Following are statistics of the work done for the month:-

Sorties	1186
Hours	490.25
Passengers	12332
Freight	1,492,477
Mail	254,007

3. Hours Summary. The following table sums up the flying hours:-

	MAY	1968/69
Planned	509.30	5506.25
Achieved	490.25	5498.50

4. General. A new high has been achieved in load figures this month, breaking the squadron record for the third time in 1969. If the statistics given are resolved, it will be found that an average 3552 pounds of freight were carried on every sortie flown (3968 pounds/sortie using USAF calculations). This represents a loading efficiency of 71%: profitable airlift by any standards.

Operations

5. Operation Roadside. The squadron flew 9 hours 25 minutes on 35 sorties in support of the 5 RAR detachment at Long Binh during Operation Roadside. This type of communications flying in support of a deployed battalion is ideal work for the Caribou.

6. Mission 007. A new regular mission on the South-East Asia Schedule was commenced this month. Designated 007, this is a passenger service operating from Vung Tau to Saigon and return daily, except Tuesdays and Thursdays. The service will call at Luscombe on request. This has proved to be an efficient mission, and it was mainly responsible for the extra passengers carried this month.

7. Weather. The monsoon season announced itself with a flourish as the month opened, but little has been seen of it since. Isolated thunderstorms abound, but they have not consolidated enough to affect operations. Only two sorties were lost due to weather.

~~CONFIDENTIAL~~

~~Maintenances~~
KATUM

8. Katum Again. On the 6th May 1969 Flg Off N.F. JONSSON and crew landed A4-191 at KATUM (V187). Soon after landing the aircraft came under mortar attack. Flg Off JONSSON ordered the restraint to be released from the load and immediately took off, jettisoning the load behind him as he rolled. The closest mortar round landed some 250 feet from the aircraft, but no damage was sustained. It was at KATUM that A4-208 was badly damaged by mortar fire in February 1969.

Maintenance

9. Ground Support Equipment. With reference to the comments under this heading in the April report:-

- a. The outstanding demands for the forklift are beginning to be filled.
- b. The defective ground power units have been replaced.
- c. The hydraulic test rig was inspected and replacement has been requested.

10. Aircraft Serviceability. The serviceability rate remains high at 85.8%.

11. Caribou A4-193 has been allotted to Philippine Air Lines for 'E' Servicing.

B. Seedsman
(B. SEEDSMAN)
Squadron Leader
Commanding Officer

04 JUN 69

DATED 1 JUN 69

DOCUMENT IS DECLASSIFIED AND AVAILABLE
FOR USE BY AUTHORITY, CHIEF OF THE AIR

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

Introduction

1. This report covers the activities of No 35 Squadron during the month of June 1969.

Operational Achievements

2. Following are statistics of the work done for the month:-

Sorties	1090
Hours	469.05
Passengers	11,252
Freight	1,263,736
Mail	236,776

3. Hours Summary. The following table sums up the flying hours:-

	June	1968/69
Planned	501.10	6000
Achieved	469.05	5967.55

Thus the annual target was underflown by 32 hours 5 minutes, or 0.53%.

Operations

4. Weather. The south-west monsoon has now consolidated, bringing with it the usual problems of turbulence, bad visibility in rain, and large storm centres which have to be avoided. Because of these storm centres and the large amount of air traffic, it is standard squadron procedure to fly clear of cloud except as an extreme and last resort; and then only when under positive radar control.

5. General. There has been very little activity in the IV Corps area. Sweeps have been made during the daylight hours, but there has been no significant friendly or enemy offensive action. As a result, the 001 and 002 missions have been very poorly employed in shuttling fuel and ammunition which would normally be moved by road. This appears to be the case over most of the country, and reliable information shows that the 834th Air Division is resorting to such lengths in order to keep its airlift capability fully employed. It was because of the nature of the 001 and 002 missions that this month's flying hours target was not attained.

Maintenance

6. E Servicing. The USAF has advised that the major servicing contract for Caribou aircraft has been terminated with Philippines Air Lines and transferred to a firm in Bangkok. This will entail a reallocation of servicing dates. The squadron stagger will have to be adjusted, and it can be anticipated that the first servicing will take about three weeks longer than before.

CONFIDENTIAL

UNCLASSIFIED

- 2 -

7. Caribou Modification No 79. Two aircraft have now been completed; a slow start, but during June only six aircraft were available and work could only proceed on those not required for operations. M4-193 which has been allotted to PAL for E Servicing is due back early in the first week in July; this will enable the modifications to proceed without interruption and the NCO in-charge of the modification programme is confident of finishing by the planned date.

Equipment

8. During June no servicing days were lost owing to lack of spares. Overall supply, both from the group supply point and squadron bench stock, has improved considerably on comparison with recent months.

ROYAL AUSTRALIAN AIR FORCE

UNIT HISTORY SHEET

(AFO 18/F/5)

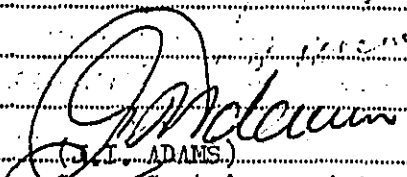

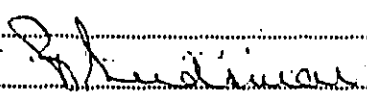

Form A 50
(Revised May, 1951)

of (Unit or Formation) No. 35 Squadron

No. of Sheet.....38.....

Place	Date	Summary of Events	References to Appendices																					
VUNG TAI, VIETNAM	4 JUL 69	Flg. Off N.E. JONASSON (0314130) GDPIIT and crew flying A4-208 lifted 31 tons of cargo from SOG TRANG to the forward support base at BAC LIEU. This was twice the quota planned to be shifted and was an outstanding exploit. To complete the 23 sorties needed to accomplish this feat within the time available required arduous and speedy labour by aircraft crew and ground loading team. Crew members were Plt. Off A.P. FRANKS (0113660) GDPIIT, A218593 A/Sgt SHARMAN B.A. ENGELTT, A56060 A/Sgt YOUNG G.I. AFFITT.																						
	4 JUL 69	Flt. Lt. N.M. HENNESSY (044089) GDPIIT, Flt. Lt. C. MONK (0221681) GDPIIT and crew departed on temporary duty to MANILA International for the acceptance of Caribou Aircraft A4-193 on completion of "E" Servicing at Philippine Airlines.																						
	9 JUL 69	Flg. Off N.E. JONASSON (0314130) GDPIIT departed on posting to 38 Squadron Vide PZ4925 dated 6 MAY 69.																						
	9 JUL 69	Flg. Off R.J. CONNOR (0221702) GDPIIT arrived on posting from 38 Squadron Vide PZ4928 6 MAY 69.																						
	11 JUL 69	Flt. Lt. N.M. HENNESSY (044089) GDPIIT, Flt. Lt. C. MONK (0221681) GDPIIT and crew arrived on cessation of temporary duty at MANILA International.																						
	18 JUL 69	Brigadier General John H. HERRING, Jr., USAF, 834th Air Division Commander visited the Squadron for familiarization talks with the Commanding Officer.																						
	30 JUL 69	Flg. Off J.W. RYDSTROM (0221706) GDPIIT departed on posting to 38 Squadron Vide PZ4927 dated 6 MAY 69.

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

Introduction

1. This report covers the activities of No 35 Squadron during the month of July 1969.

Operational Achievements

2. Following are statistics of the work done for the month:-

Sorties	1145
Hours	485.00
Passengers	11,570
Freight	1,354,978
Mail	237,370

3. Hours Summary. A total of 485.00 hours was flown for this first month of the new financial year against a target figure of 509 hours 30 minutes.

Operations

4. Weather. The south-west monsoon has become much more severe. On ten occasions airfields were overflowed, and long delays are experienced daily both in the air and on the ground in waiting for weather to pass. Considering the severity of the weather, it is a tribute to the airmanship of the crews that only ten ports were missed in over 1100 sorties.

5. 007 Mission. The 007 mission has proved so successful that the service has now been extended to run seven days a week. Basically a US mission, this service has proved very convenient to our movements organization which reserves a permanent allocation of seats.

6. General. The scheduled services have continued to operate with capacity loadings, but it is becoming harder and harder to find useful employment for 001 and 002, the common service missions. Both of these have wasted time tramping empty holds around the Delta looking for work, and the work found is often hard to justify as airlift cargo. Drums of fuel still constitute the main cargo for the 002. It is rather monotonous work, shuttling over the same 20 mile leg all day, and there has been some rivalry among crews to see who can move the most. The peak was reached one day this month when one crew flew 23 sorties and moved 152 drums - 35 tons of cargo!

Maintenance

7. The serviceability rate was 84.5%. This is remarkable because five aircraft underwent the major Caribou modification No 79 during the month. The No 2 Aircraft Depot modification team, led by F Sgt COUGHLIN E.L., did a highly commendable job in completing this modification program within the allocated time without affecting flying operations.

Equipment

8. Only one servicing day was lost for supply reasons. Otherwise supply from all sources has been satisfactory.

ROYAL AUSTRALIAN AIR FORCE

UNIT HISTORY SHEET

(AFO 18/F/5)

Form A 50
(Revised May, 1951)

of (Unit or Formation) No 35 Squadron

No. of Sheet.....

Place	Date	Summary of Events	References to Appendices																					
VUNG TAU	06AUG69	Flight Lieutenant G.M. CARSELS (0316966) GDPLT departed on posting to No 38 Squadron.																						
VIEPNAH	06AUG69	Flight Lieutenant A.E. FIELD (018938) GDPLT arrived on posting ex No 38 Squadron.																						
	06AUG69	Pilot Officer A.G. MILNE (0317844) GDPLT arrived on posting ex No 38 Squadron.																						
	20AUG69	Aircraft A4-159 went unserviceable at CAO LANH at dusk. The aircraft captain Squadron Leader B. SEEDSMAN (032527) decided to remain there overnight and arrange a rescue mission for the following day. As the airfield was insecure, an ARVN security guard was obtained for the aircraft; the crew were accommodated by the 84th Military Advisory Team, US Army. The crew were Squadron Leader B. SEEDSMAN (032527) GDPLT, Flight Lieutenant A. FIELD (018938) GDPLT, A220729 Cpl. STEINER Loadmaster and A113331 LAC JACKSON Assistant Loadmaster.																						
	22AUG69	Air Vice Marshal W.E. TOWNSEND CDE visited the Squadron during his annual inspection. The Establishment and Strength of Personnel, Aircraft and Mechanical Transport as at 31AUG69 as follows:																						
		<table border="1"> <thead> <tr> <th></th> <th>Sqn Ldr</th> <th>Flt Lt</th> <th>Plt Off/Plt Off</th> <th>TOTAL</th> </tr> </thead> <tbody> <tr> <td>ESTABLISHMENT</td> <td>1</td> <td>6</td> <td>8</td> <td>15</td> </tr> <tr> <td>STRENGTH</td> <td>1</td> <td>5</td> <td>9</td> <td>15</td> </tr> </tbody> </table>		Sqn Ldr	Flt Lt	Plt Off/Plt Off	TOTAL	ESTABLISHMENT	1	6	8	15	STRENGTH	1	5	9	15

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

Introduction

1. This report covers the activities of No 35 Squadron during the month of August 1969.

Operational Achievements

2. Following are statistics of the work done for the month:-

Sorties	1207
Hours	491.00
Passengers	12,150
Freight	1,490,651
Mail	199,016

3. Hours Summary. The following table sums up the flying hours:-

	August	1969/70
Planned	509.30	1019.00
Achieved	491.00	976.00

Operations

4. General. There was still insufficient work to re-establish the 001 mission on a regular basis, and the flown hours remain below the planned availability of an aircraft and crew is always available for tasking on this mission, but it was only called out five times. The 002 mission was much better employed this month, and much of the time it was used in supplying MOC HOA. MOC HOA is normally supplied by C123, but this month only 1000 feet of its airstrip was available. Thus although the hours are down, the airlift figures are above average and very satisfying.

5. Weather. Easterly winds prevailed for most of the month, even though the ITCZ is still well to the north. The resulting fine weather assisted operations, and was contributory to the low flying hours for the amount of work done.

Maintenance

6. The serviceability rate was 82.5%. There was an increase in the number of AIRs submitted, but these were isolated and unconnected incidents with no explicable pattern.

Equipment

7. Supply of technical spares through the USAF system remains satisfactory; although this month this system was unable to supply a certain switch, which was said to be unprocurable. The item was quickly obtained AOG from Australia, but a total of four servicing days was lost.

8. Non-technical equipment will in future be obtained from the 377th Combat Support Group at Tan Son Nhut. The account is now operational, and a demand/delivery organization has been established.

CONFIDENTIAL

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

SEPTEMBER 1969

Introduction

1. This report covers the activities of No 35 Squadron during the month of September 1969.

Operational Achievements

2. Following are statistics of the work done for the month:-

Sorties	1082
Hours	480.50
Passengers	11,844
Freight	1,152,113
Mail	180,777

3. Hours Summary. The following table sums up the flying hours:-

	September	1969/70
Planned	493.00	1511.50
Achieved	480.50	1456.50

Operations

4. General. The work available for Caribou aircraft in-country has continued to decline. During the month the maximum allowable flying time for USAF Cariboux was reduced by one hour per aircraft per day to maintain full aircraft and aircrew utilization against the reduced work-load. The effect on No 35 Squadron has been to keep the flying hours down, and particular to reduce the efficiency of the 002 mission which is tasked daily for loads available.

5. 006 Mission. The 006 Mission, the Mekong Delta scheduled mail run, has returned very poor loading figures this month. This is probably a consequence of the steady reduction of United States participation in Delta land operations. For most of the month AN THOI was closed for strip repairs and the PHU QUOC Island call was made at Duong Dong. This also contributed to the reduced mail loads.

6. Light-Duty Steel Matting. Five of the airstrips that the squadron uses regularly have been partially or totally closed during the month owing to serious damage to the runway surfaces. All these strips are surfaced with light-duty steel matting (MSA), and all have been damaged by aircraft operation after the sub-surface had been eroded by the torrential rains. Three of those airstrips were laid in the last dry season, and one as late as February.

7. Weather. Fine weather prevailed generally during the month, although the monsoonal thunderstorms still appear. These storms are less fierce than previously and pass through very rapidly, as a result operations were unaffected.

/s/ Burke

CONFIDENTIAL

8. Brake Puck Problem. The USAF exhausted its supply of brake pucks during the month and all demands were unfilled. As the normal squadron usage is 80-90 pucks per week, it was necessary to introduce a Unit Flying Order restricting the use of brakes. The restriction applies to the use of brakes at large airfields and prohibits early turn-offs for taxiing convenience. This has trebled the taxiing distance in many instances and is more an irritation than a problem. However, it has greatly reduced the puck usage. It is anticipated that normal supplies will be available in October.

Maintenance

9. The serviceability rate was 88.3%.

10. E Servicing. The Commanding Officer delivered A4-159 to the Thai Airways Aircraft Maintenance Co Ltd (Thai Am) at Bangkok to undergo E Inspection. On first appearances Thai Am appears to be a large, well equipped organization fully competent to handle the task. It was found that the new contract differed in some details to that tendered by P.L. The most significant difference was that the aircraft are no longer to be stripped and painted, but only to be given a touch-up paint job. This matter has been referred to HQRAAFV.

11. Failure Reporting System. The Failure Reporting System indoctrination team instructed all maintenance personnel on the new system over the week 8-15 September. The system was introduced on 15 September 1969.

Administration

12. Visit to 483rd TAW. The Commanding Officer made a liaison visit to the 483rd Tactical Airlift Wing at Cam Ranh Bay on the 3 and 4th September.

13. Welfare. Squadron maintenance personnel fabricated two 1200 gallon water tanks and installed them on concrete stands adjacent to the hangar. These collect the water shed from the roof of GES and provide a source of fresh, pure water. This is a welcome change to the heavily chlorinated water emanating from the Base reticulation system.

14. Personnel. There has been a rash of medical evacuations. The Senior NCOs in charge of both Instrument and Electrical Sections were evacuated; and one Loadmaster and the squadron Surface Finisher will be evacuated in the near future. Department of Air arranged rapid replacements in all cases.

NO 35 SQUADRON STAFF

THIS DOCUMENT IS DECLASSIFIED AND AVAILABLE FOR PUBLIC USE, BY AUTHORITY, CHIEF OF THE AIR

COMMANDING OFFICER'S REPORT

The No. _____

Introduction

1. This report covers in particular ^{the} activities of No 35 Squadron during the month of October 1969. As there will be a change of commanding officers in November, this report also contains some general observations gleaned by the incumbent during his tenure, and which have not been previously commented upon.

Operational Achievements

2. Following are the statistics of the work done for the month:

Sorties	1200
Hours	544.45
Passengers	13,341
Freight	1,149,368
Mail	167,924

3. Hours Summary. The following table sums up the flying hours:

	October	1969/70
Planned	509.30	2021.20
Achieved	544.45	2001.35

Operations

4. General. Activity in IV CTZ increased markedly this month and numerous ARVN operations have been staged. These operations have relied heavily on helicopter support, and in turn the Caribou has come into demand. Much of the work has been shuttling from Bin Tayu into the west of IV CTZ, and this is reflected in the large number of hours flown for an average number of sorties and freight. Passenger figures are up as a result of a number of troop and prisoner uplifts. Mail carried is well down again and this is attributed to an oversight at the 834th Air Division which caused the squadron's scheduled missions to be omitted from the South East Asia airlift Schedule when it was published for the final quarter. An amendment notice has since been distributed and mail figures should pick up in November.

5. ATF Support. The squadron was employed in tactical support of No 1 ATF for the first time when 255 soldiers of No 5 Battalion were uplifted from Xuan Moc to Luscombe at the conclusion of Operation Kingston on 15th October 1969. This was followed by an operation on 31st October/1st November when elements of No 5 Battalion were ferried from Luscombe to Phu My in exchange for elements of No 9 Battalion. 502 soldiers were carried. Both Phu My and Xuan Moc are abandoned French airfields which were resurrected by ATF engineers for the occasions.

Maintenance

6. The serviceability rate was 88.2%. There was no critical shortage of spares during October.

/Loadmasters

~~CONFIDENTIAL~~

Loadmasters

6. Loadmaster proficiency has been a critical factor in squadron efficiency. The skill, industry, and airmanship of No 35 Squadron loadmasters have been proven time and again in operations together with USAF aircraft. Paramount among these qualities is airmanship: airmanship which derives both from training and from experience. The experience gained in war is invaluable; yet the stated intention of all but one loadmaster rotated in the last twelve months was to return to the hangar floor as soon as return of service obligations were complete. All declared they were happy in the work; but the consensus was that the responsibility, the long and arduous hours of work, the repeated and prolonged separations from home and family, and the aircrew obligation of repeated study and annual recategorization were not adequately recompensed by 35 cents a day.

7. These airmen were initially carefully selected on the basis of their abilities and their record. As a group they stand out from their fellows both on trade ability and on personal qualities. The principle of loadmasters in transport aircraft is now well established: it would be in the best interests of the efficiency of the service if these airmen were offered a career in aircrew. It is of interest to note that the duties of loadmaster in USAF Cariboux are accomplished by Flight Engineers. These Flight Engineers hold a minimum grade of E5, and the Caribou is but one of the number of aircraft on which they will serve during their aircrew careers.

RAAF Movements Organization

8. The efficiency of the daily scheduled missions devolves significantly on the Air Movements Sections at Vung Tau and Tan Son Nhut, and on the organization which has been established for booking and loading. Both these sections have exhibited outstanding morale, and have provided dedicated, efficient service; originally under appalling working conditions.

Morale

9. The morale of the squadron has always been high. There is the basic esprit de corps which pervades any group of men on active service with a clear aim and documented results. Coupled with this has been the competitive rivalry with the nearby USAF Caribou Squadrons, and the sure knowledge that the Wallabies are best. There have been numerous administrative factors to keep the grumbles to a minimum: good messing, a good wet canteen, efficient mail deliveries, the Peter Badcoe club and pool, and many others. But paramount has been the support given in personnel administration; worthy of particular comment are the following:

- a. In twelve months only one airman was not posted to the base of his choice, and his was a restricted mustering. Posting advices are out two months prior to RTA, allowing ample time for resettlement planning.
- b. Investigations of compassionate circumstances are completed with incredible promptitude; and, when necessary, posting action follows at like pace. Although under the wrong heading, it is apt to comment here that the speed with which casualties were replaced was greatly appreciated.

UNIT HISTORY SHEET

(AFO 18/F/5)

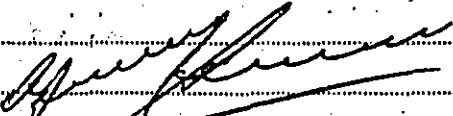

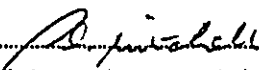

Form A 50
(Revised May, 1951)

of (Unit or Formation).....NO. 35 SQUADRON.....

No. of Sheet.....42.....

Place	Date	Summary of Events	References to Appendices																					
VUNG TAU	NOVEMBER 1969																							
	5TH	Flying Officer G.D. STEWART (054917) EQUIP arrived on posting ex BSPEA.																						
	12TH	The Squadron was employed on a supply drop mission, dropping A22 containers in support of Australian Forces in the NUI DAT area. On the first drop the main parachute failed to open resulting in the destruction of the load of ammunition. Subsequent supply drop operations on 14th November and 16th November were completed without incident.																						
		Flight Lieutenant M.A. PARK (0219050) EQUIP departed on posting to DEPAIR.																						
	19TH	Squadron Leader S.G.K. MITCHELL (0219050) GD FLT arrived on posting ex 38SQN to take up appointment as Commanding Officer No 35 Squadron.																						
	24TH	Command of No 35 Squadron was officially transferred from Squadron Leader B.W. SEEDSMAN (032527) GD FLT to Squadron Leader S.G.K. MITCHELL (0213595) GD FLT.																						
	26TH	Squadron Leader B.W. SEEDSMAN (032527) GD FLT departed on posting to RAAF Staff College. Air Vice Marshall E. HEY CB, CBE, Air Member Technical Services, inspected 35 Squadron as part of a general inspection tour of units operating in the area.

NO 35 SQUADRON

File No.

COMMANDING OFFICER'S REPORT

Introduction

1. This report covers the activities of No 35 Squadron during the month of November 1969.

Operational Achievements

2. The following are the statistics of the work done for the month:

Sorties	1106
Hours	507.50
Passengers	12,315
Freight	1,163,033 lbs
Mail	164,485 lbs

3. Hours Summary. The following table sums up the flying hours:

	November	1969/70
Planned	500.00	2521.20
Achieved	507.50	2513.55

4. Excluded from the above figures is one hour flown by a USAF crew in A4-159 after 'E' Servicing at Bangkok.

Operations

5. General. The flying activity continued at a steady rate. Whilst the hours for the month were not as high as last month they were above the planned rate. A number of extra missions were flown. Three of these were for rescue of aircraft with unserviceabilities. The rescue aircraft were usefully backloaded to Saigon and Vung Tau thus avoiding wastage of flying effort.

6. 001 Mission. This has become a regular Sunday occurrence to carry MACV loads as tasked. This mission will be maintained in order to take advantage of the favourable weather conditions.

7. Weather. The weather improved greatly during the latter part of the month. Although strong northerlys created cross-wind problems at some airfields, the reduction in the amount of cloud and rain assisted flying conditions considerably. No airfields were overflowed because of weather and it is significant to note that this squadron's aircraft were the only aircraft to land regularly at AN THOI for over a week. Other aircraft were prevented from landing there because of their lower crosswind limitations.

8. ATF Support. The squadron completed the change over of 5RAR and 9RAR at the beginning of the month with 5 shuttles. On 3 days during the month the squadron again operated in direct support of the ATF and dropped supplies to the force in the field. It is hoped to continue these supply drops so that all members concerned can remain current in the techniques and procedures.

/Maintenance

~~UNCLASSIFIED~~
~~CONFIDENTIAL~~
~~SECRET~~

Maintenance

9. The serviceability rate was 86.5%. Improved quality control by the USAF overhaul facility has decreased the number of unscheduled engine changes. This year two engines have reached full reconditioned life.

10. The local squadron modification to the ARC 54 FM radio has been completed and the number of unserviceabilities associated with weak side tone has decreased. A draft modification for RASC approval is being raised.

11. RAAF STI Caribou 91. This STI was received on 28NOV69 and so far one aircraft has completed the full check with negative results. All other aircraft have had a visual inspection pending removal of the elevations during the next three weeks.

12. Ground Support Equipment. The Hyster (Aircraft Lifting Reg No TC200) is partially unserviceable due to the rear engine oil seal, starter motor seal to the clutch, and rear clutch seal, being damaged allowing hydraulic oil to be discharged into the engine sump and starter motor from the hydraulic clutch. Rectification of this unserviceability is beyond the capacity of this unit and No 10SU Transport Section. The Hyster arrived at VUNG TAU on 05 AUG 66 and has completed 3,860 hours of operation. During this time it has not undergone an overhaul (also beyond the capacity of No 35 Sqn and No 10SU) and most components are badly worn. The Hyster is essential for minor and 'D' Servicings and its restricted use has caused the STI programme mentioned in para 11 to be delayed. Message 3394, 35S/2107/1/Equip Pt 4 (59) of 01DEC69 to RASC requests immediate replacement of the Hyster.

13. 'E' Servicings. On the 24NOV69 the second squadron aircraft, A4-191, was delivered to THE AIRWAYS AIRCRAFT MAINTENANCE CO LTD BANGKOK to undergo 'E' Servicing. A4-159 was returned to the squadron some 13 days late on 29NOV69. The delay was caused by the need to strip and paint which was not included in the original contract. (Refer RALPAFV T421 10OCT69 and 35S 2503/7/Tech Pt 1 (13). A4-159 returned with over 40 minor unserviceabilities but at this early stage it is not possible to determine the standard of the servicing performed.

14. At the end of the month there were not any serviceable propellers in South Vietnam. The 'D' Servicing commenced on 25NOV69 has been delayed awaiting new propellers and an AOG demand for one propeller on Australia was raised on 29NOV69. Supply was prompt and the propeller was received on 02DEC69.

Equipment

15. One servicing day was lost during the month through lack of spares. Apart from the shortage of propellers as mentioned above, supply from all sources has been satisfactory.

Administration

16. The command of No 35 Squadron was handed over from Sqn Ldr B.W. SEEDSME (032527) CD PLT to Sqn Ldr S.C.K. MITCHELL (0213595) on 24NOV69.

17. Visit to 483rd TAF. During the handover/takeover of command of the squadron a liaison visit was made to the 483rd Tactical Airlift Wing at CMR BANG BAY on 23rd and 24th November.

of (Unit or Formation) NO 35 SQUADRON

21
Form A 50
(Revised May, 1951)

No. of Sheet 43

Place	Date	Summary of Events	References to Appendices															
	DECEMBER 1969																	
VUNG TAU VIETNAM	8TH	Flight Lieutenant K.V. GRIFFIN(043348) ENGAERO proceeded on temporary duty to Thai Airways Aircraft Maintenance Co. BANGKOK to inspect 'E' Servicing of A4-191 delivered on 24th November. Member returned on the 12th December 1969.																
	13TH	Flying Officer R.J. MCGREGOR (0314134) GD PLT departed on posting to No 37 Squadron vide PZ7984 16OCT69.																
	15TH	For the first time in South Vietnam the Squadron was employed in Paratroop operations in support of the Australian Army, when a squad of 10 Paratroopers of 3 Squadron Special Air Service was dropped into an area 10 miles east of Luscombe in the Nui Dat Area Phuoc Tuy Providence. This squad acted as pathfinders and set-up the drop zone preparatory to a main force drop planned for the following day.																
	16TH	A further 90 members of 3 Squadron Special Air Service were para-dropped into the area prepared on 15th December.																
	19TH	Pilot Officer M.J. CALVERT (057541) GD PLT arrived on posting ex No 38 Squadron vide PZ7985 16OCT69.																
	31ST	For the first time in over 12 months the Squadron was tasked to carry out an Aero Med Evac sortie. Twelve litter patients and six ambulatory (walking wounded) patients were carried from Cu Chi to Tan Son Nhut Air Base.

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

DECEMBER 1969

Introduction

1. This report covers the activities of No 35 Squadron during the month of December 1969.

Operational Achievements

2. The following are the statistics of the work done by the Squadron for the month:

Sorties	1199
Hours	550.35
Passengers	12,473
Medevac	15
Freight	1,257,398 lbs
Mail	206,314 lbs

3. Hours Summary. The following table sums up the flying hours:

	December	1969/70
Planned	542.40	3064.00
Achieved	550.35	3064.30

Operations

4. General. The hours flown for the month were the highest since July 1963. Being the Christmas Season, a number of extra missions were planned and flown in support of both the Americans and the Australians serving in South Vietnam. These extra missions ranged from moving the increased number of personnel who were on RFA or RAR just prior to Christmas, to carrying the ABC Concert Party to American and Australian bases.

5. ATF Support. The Squadron completed the first operational paratroop drop of Australian Forces in South Vietnam when 100 members of No 3 Squadron ATF were dropped in PHUOC THY Province on 15th and 16th December. The drop was completely successful.

6. Weather. The weather during December was typical of the dry season with good flying conditions. Only one airfield was overflown because of excessive crosswinds.

7. Medevacs. For the first time in well over 12 months the Squadron was tasked to do a Medevac sortie on 31st December. Twelve litter patients and six ambulatory patients were carried. It is anticipated that this will not become a regular task.

8. Mail. There was a significant increase in the amount of mail carried during the month (November 164,485 lbs). As mentioned in the October report, the Squadron was omitted from the South East Asia Airlift Schedule and it has taken three months for the amendment to become effective.

CONFIDENTIAL

/s/ [Signature]

Maintenance

9. Even with the increased flying effort during the month the serviceability rate was 88.2%. There was one unscheduled engine change during the month caused by three broken studs on No 7 cylinder.

10. Ground Support Equipment. The Maintenance Flight's efficiency continued to be affected by unserviceable ground support equipment. A new prime mover for the Hyster arrived from Butterworth on 31st December and it is now in the process of reassembly. The Clarktor remains stationary, as it has been since 7th November 1969. After many confusing messages an allotment authority (TALC 32/69) was received on 22nd December but no action is forthcoming. HQSC message 2675/841B refers.

11. 'E' Servicing. On the 8th December the Squadron LMGCO visited the Thai Airways Aircraft Maintenance Co Ltd at BANGKOK to inspect the 'E' Servicing of A4-191 which was delivered to THAI AA on 24th November. The poor standard of the 'E' Servicing on A4-159 (released by THAI AA on 26NOV69) was also discussed. A large list of discrepancies found on A4-159 was mentioned to the USAF Quality Assurance Team. The LMGCO was able to inspect A4-191 in a partially dismantled condition and with all the surface finish removed. Very few areas of corrosion were evident, indicating that Caribou Instructions are covering the problem of corrosion adequately.

Equipment

12. Some minor problems were encountered during the month in the supply of equipment against the account with 377th Combat Support Group, Tan Son Nhut. The situation should be rectified early in the New Year. No servicing days were lost during the month through lack of spares.

Administration

13. During December three airmen received postings to locations other than one of their three preferences. This is the first time this has happened in over 12 months. One airman was asked to resubmit alternative preferences and he was reposted to a Unit of his choice. The postings of the other two airmen remain unchanged. (353/1201/6/P3(43) 18DEC69 refers).

Morale

14. Excellent support was given by the Catering Flight of No 10SU in providing an outstanding Christmas dinner. This, together with food parcels from home and a visit by the ABC Concert Party helped to maintain the high morale of the airmen during the Festive Season.
