THIS DOCUMENT IS DECLASSIFIED AND AVAILABLE FOR PUBLIC USE, BY AUTHORITY, CHIEF OF THE AIR

COMMANDING OFFICER'S REPORT

JANUARY 1971

Operational Achievements

1. For the detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Operational

2. Aircraft utilisation during the month was good, but showed a small drop-off from that of December 1970. The increased use of the 002 mission in particular is contributing largely to the higher freight figures for the month.

Maintenance

3. As a result of the discovery of corrosion in A4-159 and A4-140, a programme has been agreed with THAIAM to inspect aircraft closely during the major servicing. Corrosion repair will now be done by the contractor.

4. There were no major problems on the maintenance side during January. The continuing overfly will probably require an extra D servicing at the end of February, but this has in fact been planned and will pose no problems.

5. The average serviceability rate for the month was 85.2%.

Equipment

6. The equipment system continues to work smoothly.

Non-Battle Casualties

7. Two members of the Servicing Flight were medevaced during January.

STAGE
 COMMANDING OFFICER'S REPORT

FEBRUARY 1971

File No.

Operational Achievements

1. For the detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Operational

2. Aircraft utilization during February was good, but a tendency towards longer leg distances has cut back the sortie rate in comparison with December and January, which is reflected in the lower freight figures for February. The 001 and 002 Missions continued to be used mainly for carrying ammunition and POL.

Maintenance

3. One extra 'D' Servicing was done during the month. This was caused by the slight overfly position. (173 hours at 28th February 1971). Four cracked cylinders were found in the starboard engine of A4-140, an Australian engine. This engine was changed, being the only unscheduled engine change for the month.

4. The average serviceability rate for the month was 83.2%, mainly due to the extra 'D' being carried out.

Equipment

5. The equipment system worked extremely well. One area which may become a problem is propellers, which are in short supply again and are only being issued from the 483rd TAW to satisfy GNORS.

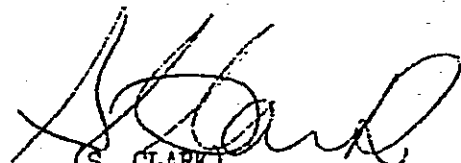

Performance Testing

6. The USAF has modified their SOP for engine failure after take-off in the light of the five major accidents they have suffered in country. Being not entirely satisfied with the USAF recommendations the Squadron has undertaken an intensive evaluation of Caribou single engine performance. A full report will be submitted in due course.

Non-Battle Casualties

7. No members of the Squadron were hospitalized during February.

COMMANDING OFFICERS REPORT

MARCH 1971

File No.

Operational Achievements

1. For the detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Operations

2. Aircraft utilization continues to be good, but there was a tendency towards the end of the month towards reduced loading. There appears to have been a reduction in the demand in III and IV Military Regions for transport support in general.

Maintenance

3. Serviceability during March remained good. Two unscheduled engine changes were done. A4-173 completed IRAN and arrived back at Vung Tau on 31st March 1971.

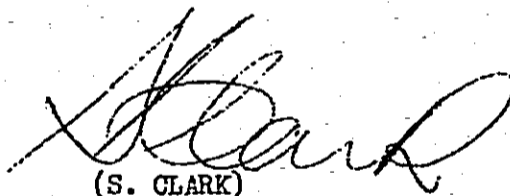

4. The average serviceability for the month was 85.56%.

Equipment

5. The equipment system worked well in March.

Non-Battle Casualties

6. Four members were hospitalized during the month of March with various complaints.

COMMANDING OFFICERS REPORT

APRIL 1971

Operational Achievements

1. For the detailed weekly statistics see WORS. A summary of totals for the month is at Annex 'A'.

Operations

2. The reduced loadings mentioned in the report for March 1971, has continued during April, but the rate of reduction has decreased. The main tasks of the 001 and 002 missions continues to be the supply of ammunition to forward airfields.

Maintenance

3. Preparation of Aircraft for Return to Australia. In order to comply with Department of Air plans for a run down in the RAAF strength in Vietnam three aircraft are being prepared for the return flight to Australia.

4. Serviceability. The average serviceability for the month dropped to 83.38%. The March figure was 85.56%. This drop in serviceability was caused mainly by:

- a. wing span corrosion repairs; and
- b. preparation of aircraft for return to Australia (see para3).

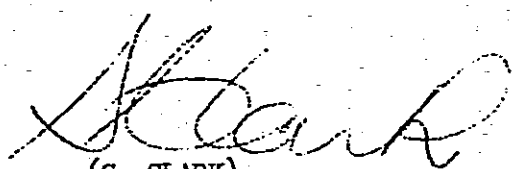

Equipment

5. Some difficulties have been experienced in obtaining IOCs from the United States Supply system, but the squadron equipment organisation itself worked well.

Non Battle Casualties

6. Four members of the squadron were admitted to hospital during the month.

NO 35 SQUADRON

COMMANDING OFFICER'S REPORT

MAY 1971

Operational Achievements

1. For the detailed weekly statistics see WORS. A summary of totals for the month is at Annex A.

Operations

2. On the morning of 25th May, the Squadron ceased to operate the 001, 004, 005 and 007 Missions because of the reduction in aircraft from seven to four. Missions now being flown daily are 002, 003 and 006. This revision of the task will utilize some 300 hours per month.

3. When A4-234 returns from BANGKOK it is proposed to operate the 004 mission on an 'as required' basis to provide spares support from CAM RANH BAY.

4. The tempo of operations remains high and utilization during May was good.

Maintenance

5. All maintenance aspects remained satisfactory. Additionally the final preparation of the three aircraft to return to AUSTRALIA was completed. A4-234 was ferried to THAIAM on 9th May 1971, and it will probably be the last Squadron aircraft to undergo IRAN servicing.

Serviceability

6. The average serviceability for the month was 85.16%.

Equipment

7. Three servicing days were lost due to the delay in supplying a cargo door transverse rod, not carried as a spare. All other equipment aspects continued to be efficiently managed.

Non Battle Casualties

8. No members of the Squadron were hospitalized during May.

COMMANDING OFFICER'S REPORT

JUNE 1971

Operational Achievements

1. For detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Establishment Change

2. With effect 1st June 1971, the aircraft establishment of the Squadron was reduced to four. Additionally aircrew establishment was reduced to nine pilots, four loadmasters and two assistant loadmasters. Groundcrew was reduced from sixty six to forty seven. With this revised establishment the Squadron is to maintain a flying rate of 300 hours per month (3,600 hours per year).

Caribou Ferry

3. The three aircraft surplus to the revised establishment were ferried to Richmond by No 35 Squadron Detachment A, departing Vung Tau on 1st June 1971 and arriving at Richmond on 7th June. No problems or delays occurred during the ferry operation.

Revised Operations

4. Two missions are now being flown daily; Missions 002 and 003. Since A4-234 is undergoing IRAN servicing at TAHIAN in Bangkok, the Squadron has been operating two aircraft out of three for the entire month. During the period of the 'D' Servicing of A4-173 (16th - 21st June) the effort was maintained with two aircraft out of two flying each day except 18th June when the 002 mission was cancelled due to an hydraulic malfunction in A4-208.

5. Comparison of passenger and mail figures in Annex A with those of previous reports would indicate that utilization of the 003 mission has improved. The slightly lower than expected freight figure is the result of a simple decrease in the overall requirements of the Free World Forces for 27 effort in MR III and IV and also the tendency towards longer sorties.

Maintenance

6. All maintenance aspects remained satisfactory. The new three weekly programme of 'D' Servicing has been introduced and is running smoothly.

Serviceability

7. The average serviceability rate for June was 85.56%.

Equipment

8. Until the return of A4-234, delivery of spares from Cam Ranh Bay is being done by USAF aircraft. Direct flights from Cam Ranh are now being arranged through 483 TAW since the normal methods were unreliable.

9. Close supervision by the Equipment Staff during the month prevented any loss of servicing days during June.

Non-Battle Casualties

10. Two members of the Squadron were hospitalized during June.

NO 35 SQUADRON
COMMANDING OFFICER'S REPORT

JULY 1971 File No.

Operational Achievements

1. For detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Operations

2. Operations on the reduced scale continued to be satisfactory although the 002 mission potential is now no longer fully utilized. The volume of work available from 834th Air Division in MR 3 and 4 is steadily decreasing. The 003 mission, however, is being better utilized by AFV and is in fact the more effective of the two missions being flown.

3. With the return of A4-234 from IRAN in BANGKOK on 24th July 1971, the Squadron is now able to operate a weekly 004 mission to CAM RANH BAY and return to ensure spares support. Also extra tasks such as supply dropping and the occasional support of the AATV can now be accepted and done.

Maintenance

4. A4-173 was grounded from 6th to 8th July inclusive due to a split No 1 (port) fuel cell. The cell was replaced by one obtained from AUSTRALIA. It is interesting to note that the cell ordered through the USAF has not yet arrived.

5. One engine failure occurred in flight in A4-234. The cause was a crack in No 6 Cylinder. Inspection also revealed a crack in No 14 cylinder. Additionally, No 4 (port) fuel cell had to be replaced due to a split, probably caused when the tank was replaced during IRAN servicing.

6. Some corrosion was discovered during 'D' Servicing in A4-179. Fortunately it was removed by blending.

Serviceability

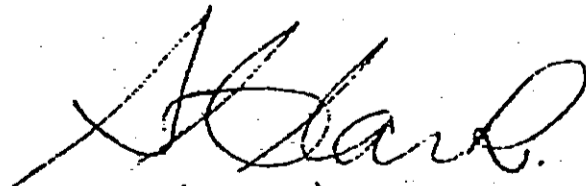

7. The average serviceability for the month of July was 83.17%.

Equipment

8. With the exception of the USAF inability to supply a No 1 fuel cell, all equipment aspects remained satisfactory.

Non-Battle Casualties

9. One member of No 35 Squadron was hospitalized during July.

COMMANDING OFFICER'S REPORT

AUGUST 1971

Operational Achievements

1. For detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Operations

2. Utilization of the 002 mission improved somewhat during August. On several occasions, ALCC requested extra sorties which were granted. Combined with the extra tasks in support of AATTV to DANANG on 19th August and to CIE THO on 26th August, the target hours were exceeded.
3. In order to maintain a reasonable level of activity, the 002 mission on Sundays has been cancelled. This should hold the available effort within bounds.

Maintenance

4. All maintenance aspects continued to be satisfactory during August. Small problem areas such as the unreliability of US Army refuelling facilities at VUNG TAU and short delays due to USAF inability to supply spares did not seriously hamper operations.
5. During September, the 'D' cycles will be slightly adjusted to take up the overfly for August and also to lead in to the Squadron withdrawal programme.

Serviceability

6. The average serviceability for the month of August was 83.87%.

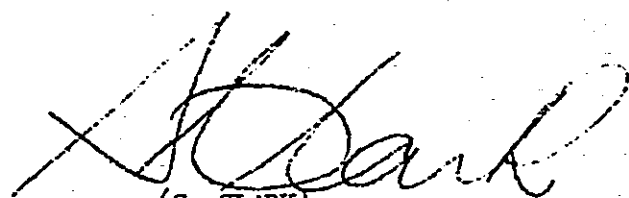

Equipment

7. All equipment aspects were satisfactory during August. Additionally, in preparation for eventual withdrawal, RAAF stocks have been reduced to a minimum and schedule checks have been done on all four aircraft and anomalies adjusted. AIU holdings are currently being examined for unserviceable and surplus items.
8. At this stage it is not possible to take any action in regard to USAF equipment. However preliminary planning as to the disposal of these items is being carried out.

Non Battle Casualties

9. One member of the Squadron was hospitalized during the month.

COMMANDING OFFICER'S REPORT

SEPTEMBER 1971

Operational Achievements

1. For detailed weekly statistics see WORS. A summary of the totals for the month is at Annex 'A'.

Operations

2. Operations continued on schedule during September. The weather deteriorated towards the end of the month but this, although it caused cancellation of some sorties of the 002 mission remained a nuisance factor only.

3. The 002 mission was cancelled on three occasions in order to provide hours for a DANANG special and also to keep the servicing cycles under control. There is sufficient flexibility now to mount a short period of high utilization should this become necessary during the withdrawal of No 1 ATF from NUI DAT.

Maintenance

4. All maintenance aspects continued at the usual high level.

Serviceability

5. The average serviceability for the month of September was 90.00%.

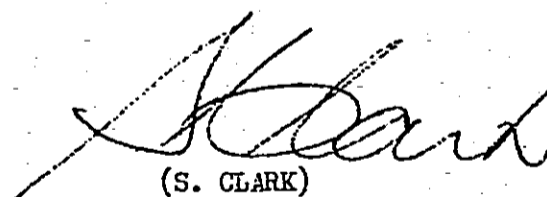

Equipment

6. All equipment aspects remained satisfactory during the month

Non-Battle Casualties

7. Three members of the Squadron were hospitalized during September.

COMMANDING OFFICERS REPORT

OCTOBER 1971

Operational Achievements

1. For detailed weekly statistics see WORS. A summary of the totals for the month is at Annex A.

Operations

2. Operations continued without interruption during the month. The requirement for the 003 mission to be routed via LUSCOMBE ceased, but a daily 006 mission consisting of two shuttles from VUNG TAU to LUSCOMBE was instituted. This mission supplies 4RAR daily fresh ration requirements.

3. On 6th and 10th October, 3RAR and SAS respectively were lifted out of LUSCOMBE to VUNG TAU. The missions were completed without incident.

4. The 002 mission is being well utilized, mainly in the Delta area. With the imminent change in tasking, it will probably be profitable to allocate the surplus flying hours back to 834th Air Division in the form of a 001 mission once or twice a week. This mission would be fragged in a similar manner to the 002.

Maintenance

5. Day to day maintenance remained at the usual high level. Second line maintenance however suffered a setback when corrosion was discovered in A4-179 during the 'D'. The roll-out of A4-179 was delayed, mainly due to the inability of the USAF to supply spares.

Serviceability

6. The average serviceability for October was 84.67%.

Equipment

7. The equipment system functioned well during the month. When the USAF source dried up, demands were placed on AUSTRALIA and the spares were received in record time.

Non-Battle Casualties

8. One member of the Squadron was hospitalized during October.

COMMANDING OFFICER'S REPORT

NOVEMBER 1971

Operational Achievements

1. For detailed weekly statistics see WORS. A summary of totals for the month is at Annex A.

Operations

2. The only regular missions flown during November were 002, and 003 daily, with one squadron support mission to CAM RANH BAY each week.

3. On 7th November the last remaining Australian Army personnel were lifted out of NUI DAT to VUNG TAU without incident.

4. The 002 mission is still being well utilised in the Delta area, carrying rations, canteen supplies, passengers and mail.

Maintenance

5. Aircraft serviceability remained at a high level. However, A4-179 required the starboard engine to be changed twice in quick succession. Both changes were due to internal failure.

Equipment

6. Apart from some minor problems with the US supply system, equipment aspects were satisfactory.

Squadron Withdrawal

7. Planning and preparation for the withdrawal of the Squadron are well under way. No major problems are foreseen.

Headquarters Operational Command Administrative Order No 2/72
Re-deployment of No 35 Squadron from Vung Tau to RAAF Base Richmond

Reference: A. Department of Air Organization Directive No 23/71

Introduction

1. The Australian Government has directed that the Australian Forces in Vietnam be redeployed to Australia by early 1972. To implement this direction No 35 Squadron will move to RAAF Base Richmond in February 1972. Subsequently the Squadron will redeploy to RAAF Base Townsville on the completion of works at that base. The new role of No 35 Squadron will be assumed after the Squadron deploys from RAAF Base Richmond to RAAF Base Townsville in 1974/75. In the interim, a short range transport role similar to that presently undertaken by No 38 Squadron will be assumed by the Squadron after arrival at RAAF Base Richmond.

Intention

2. To detail the arrangements for the redeployment of 35SQN from Vung Tau to RAAF Base Richmond by 26th February 1972.

Execution

Organization Aspects

3. Operations. 35SQN will cease operations in the transport support role coincident with the withdrawal of the Squadron from the US 7th Air Force order of battle on 14th February 1972.

4. Command and Control.

- a. COMRAAFV will assume full command of 35SQN from COM7FC and operational control from Commander 7th Air Force on the cessation of squadron operations in Vietnam. COMRAAFV will retain operational command of 35SQN until Squadron aircraft enter Australian airspace.
- b. AOC Operational Command will assume command, that is functional and administrative control, of 35SQN through OC RAAF Base Richmond from the time squadron aircraft enter Australian airspace. Once 35SQN arrives at RAAF Base Richmond it is to be an independent non-self-accounting unit.

/5. Redeployment

RESTRICTED

5. Redeployment. COMRAAFV will redeploy 35SQN from Vung Tau to RAAF Base Richmond by 26th February 1972.
6. Discipline. CO 35SQN is to continue to exercise powers of a commanding officer in accordance with AFO 12/E/1. Coincident with AOC Operational Command assuming command of 35SQN, OC RAAF Base Richmond is to exercise powers of review in accordance with RP10.
7. Role. The role and tasks of 35SQN as detailed in ASD235 Chapter 21 will cease with effect from 14th February 1972. Wef 27th February 1972, 35SQN is to assume an interim short range transport role similar to 38SQN, except that 38SQN will retain the Caribou commitment in TPNG until shortly before 35SQN moves to RAAF Base Townsville. Further responsibility for Caribou conversion training is to remain permanently with 38SQN. DEPAIR (DAFP) will advise by amendment to ASD235 the new role and tasks of 35SQN to be assumed when the Squadron deploys to RAAF Base Townsville.
8. Squadron Aircraft Allocation and Rate of Effort. DEPAIR (IGOR) will advise the revised aircraft UAE and rate of effort. HQSC will coordinate arrangements for the re-allotment of aircraft between 38SQN and 35SQN on the arrival of 35SQN at RAAF Base Richmond.
9. Squadron Organization. The organization of 35SQN is dependent on the outcome of deliberations on the future maintenance policy for the Caribou force at RAAF Base Richmond. Consequently the organization of 35SQN will be promulgated when the policy is determined.

Engineering Aspects

10. General. DEPAIR (DAIRTC) will issue a policy letter regarding the modification state of 35SQN aircraft for Australian operations. The implementation of this policy will be the joint responsibility of HQOC and HQSC.
11. Maintenance Policy. The future maintenance policy for the Caribou force at RAAF Base Richmond following the redeployment of 35SQN is still under consideration. This Order will be amended when the maintenance policy has been determined.

Aircraft Ferry and Repatriation of Personnel

12. General. COMRAAFV will issue the necessary orders detailing the arrangements for the ferry of 35SQN aircraft to RAAF Base Richmond and repatriation of 35SQN personnel.
13. Route. The following route will be flown by 35SQN aircraft:

<u>Day</u>	<u>Route</u>	
1	Vung Tau - Tengah	RON
2	Tengah - Djakarta	RON
3	Djakarta - Bali International	RON
4	Bali International - Kupang	Refuel
	Kupang - Darwin	RON
5		Crew Rest
6	Darwin - Alice Springs	RON
7	(Alice Springs - Broken Hill	Refuel
	(Broken Hill - Richmond	

/14. Diplomatic

RESTRICTED

-3-

14. Diplomatic Clearances. DEPAIR (EAO/CAS) will arrange diplomatic clearances for the route detailed at paragraph 13, and will advise all concerned.

15. SAR and En-Route Facilities. SAR, en-route facilities and logistic support will be provided as follows:

- a. OC RAAF Base BUTTERWORTH will be responsible for the route from Vung Tau until the aircraft enter Australian airspace; and
- b. AOC Operational Command is responsible for the route from the time the aircraft enter Australian airspace.

16. POL. CO 35SQN is to ensure that the provisions of AFO 20/J/56, ABO E34/2 paras 18 to 20 and ABO E34/3 para 15 are observed in respect of obtaining en-route POL.

17. Medical Requirements. COMRAAFV will ensure that members of 35SQN comply with the medical requirements for personnel on repatriation from Vietnam as detailed in ABO A(old) 7/22 and DGMS instructions. Attention is directed to the requirement for the continued use of Malaria suppressive drugs in view of the route to be flown.

18. Quarantine Requirements.

- a. COMRAAFV will ensure that CO 35SQN implements the quarantine procedures in relation to the return of RAAF equipment, aircraft and personal effects to Australia as detailed in ABOs A(old)7/14, A(old)9/16 and relevant Australian Quarantine Regulations;
- b. OC RAAF Base DARWIN is to arrange quarantine clearance for 35SQN aircraft and ferry personnel during days 4 and 5 (see para 13);
- c. DEPAIR (DGMS) will issue additional quarantine instructions to COMRAAFV and OC RAAF Base DARWIN.

19. En-Route Expenses. The authorization of overseas en-route expenses for 35SQN personnel is to be in accordance with Overseas Service Determination Volume 1 Order 21/11/2 paragraph 3. En-route expenses incurred in Australia are to be met in accordance with FC 1969/3 Sect 20. CO 35SQN will carry an advance to cover accommodation and meal expenses incurred by ferry personnel en-route at non-RAAF bases.

20. Documentation. All members of 35SQN involved in the aircraft ferry will be in possession of the following documents at the time of departure from Vung Tau:

- a. current identity cards;
- b. current passports and relevant visas;
- c. International Health Certificates; and
- d. Identity discs.

/21. Security

RESTRICTED

21. Security. The following security classifications are to apply to the redeployment of 35SQN:

- a. Details of departure of 35SQN from Vietnam and arrival in Australia, before departure RESTRICTED
- b. As for a., after departure UNCLASSIFIED
- c. Future location of 35SQN UNCLASSIFIED

22. Public Relations.

- a. COMRAAFV, in consultation with the Public Relations staff at HQAFV will arrange PR coverage of the departure of 35SQN from Vung Tau. This coverage is not to prejudice the safe withdrawal of the ATF or 35SQN.
- b. OC RAAF Base RICHMOND is to arrange PR coverage for the arrival of 35SQN aircraft at his base.

Reception at RAAF Base Richmond

23. General. A detachment of 35SQN to act as an advance party will be formed at RAAF Base Richmond. The detachment will be manned by members of 38SQN and will assist in the smooth integration of 35SQN into activities at RAAF Base Richmond.

24. Formation 35SQNA. This Administrative Order is the authority to create No 35 Squadron Detachment A (35SQNA) in accordance with AEO A (New) 2/2. OC RAAF Base RICHMOND is to form 35SQNA as a non-self-accounting detachment wef 10th January 1972 subject to the parameters detailed in this paragraph and paras 25 to 30 inclusive.

25. Function 35SQNA. The function of 35SQNA is to ensure that adequate preparations are made for the arrival of 35SQN at RAAF Base Richmond. In discharging this function OC 35SQNA is to:

- a. provide advice when required to OC RAAF Base Richmond;
- b. liaise with unit commanders regarding aircraft maintenance;
- c. liaise with CO BSRIC for the provision of base services, including operational and technical accommodation and facilities, and domestic accommodation; and
- d. prepare the areas assigned to 35SQN to receive the Squadron and its associated equipment.

26. Disbandment of 35SQNA. OC RAAF Base RICHMOND is to disband 35SQNA on the arrival of the CO 35SQN at RAAF Base Richmond.

27. Command and Control. AGC Operational Command will exercise command of 35SQNA through CO RAAF Base RICHMOND.

28. Discipline. OC 35SQNA is to exercise the powers of an officer commanding a detachment in accordance with AFO 12/E/2. OC RAAF Base Richmond is to exercise powers of review in accordance with RP10.

/29. Establishment

RESTRICTED

RESTRICTED

-5-

29. Establishment. The requirement for 35SQNA will be for a period of about six weeks; consequently no establishment action will be taken.
